PART II. commences page 40, and is alphabetically arranged.

THIS SECTION EMBRACES BULBS, TUBERS, AND PLANTS, NOT SPECIFIED IN PART I.

"——— call the vales and bid them hither cast
Their bells and flowerets of a thousand hues."—Milton.

BARR & SON,

12, KING STREET, COVENT GARDEN, LONDON, W.C.

SPECIAL NOTICES.

SPECIAL NOTICES.

- I. **Quality.**—When the Dutch Bulbs are in flower, professionally we visit the principal "bulb farms" of Holland to inspect the crops, and our supply of Dutch-grown bulbs is drawn from the healthiest "stocks" of the most reliable growers; we can, therefore, recommend with confidence the bulbs, &c., offered, feeling sure, if properly treated, they will give satisfaction.
- II. In our Experimental Grounds, we have a representative collection of Hardy Bulbous and Tuberous Rooted Plants, and at Leiden, Holland, Messrs. de Graaff Brothers grow our Mexican, Californian, Cape Bulbs, &c. The culture at Tooting is under the direction of Mr. J. W. Barr, who was specially trained in the **Famed Bulb Gardens** of the Messrs. de Graaff Brothers.
- III. The collection of Daffodils cultivated by us is the most complete ever brought together; it embraces almost every species and variety known to Gerrard, Parkinson, Haworth, Herbert, Salisbury, and Baker; also includes the new hybrids and varieties raised by Leeds, Backhouse, Nelson, Leichtlin, &c. These new Daffodils were put in order by Mr. Barr, and named by the Committee appointed at the Daffodil Conference, held 1st April, 1884, under the auspices of the Royal Horticultural Society. The labours of the Committee are recorded in all the Gardening Papers of May, 1884, and in *The Florist and Pomologist* of June, July, and August following, a revised descriptive list was published of all Daffodils, from the earliest times, including the new varieties named by the Conference Committee in April, 1884. This list, along with the history, culture, hybridization, and poetry of the Narcissus is embodied in "*YE NARCISSUS OR DAFFODIL*," price 1s. by post.
- Daffodils are all perfectly hardy, remaining uninjured in the open ground during the most severe winters. The late Mr. Leeds remarking on the new sorts, said, "These are not ephemeral productions, but will last for centuries with very little care, as the common kinds have done in our gardens." In the open ground from the different varieties a succession of flowers is maintained from early in February to end of May; our beautiful new Pyrenean Sulphur Daffodil (*N. Pallidus praecox*) opens its delicately coloured flowers early in February. When cultivated under glass, three in a 4 or 5 inch pot, Daffodils are very decorative, and a succession can be had from early in January, if treated in the same way as the Hyacinth. *Arrangements have again been made for a series of Exhibitions of Cut Daffodils in connection with the various Spring Flower Shows of the Royal Horticultural Society, South Kensington, the Botanic Society, Regent's Park, and Crystal Palace, for 1887.*
- IV. **Medals, Certificates, etc.**—The Royal Horticultural Society have awarded to us, for our Exhibitions of New Daffodils for many years past, Gold Medals, Silver Medals, &c., with numerous Votes of Thanks, and many First Class Certificates to individual new Daffodils. From the Royal Botanic Society we have had many Awards, Certificates, and Medals for Daffodils. April, 1884, 1885, and 1886 our Daffodils were the great feature of attraction at the Crystal Palace Spring Flower Show.
- V. ~~and~~ **Naming Daffodils.**—It is not always possible for us to give the necessary attention to the numerous cut specimens of daffodils that reach us *during our busy seed season*. Our friends in future will do us a great kindness, if, instead of sending their specimens to us, they send them to the Daffodil Committee of the Royal Horticultural Society. Information as to dates when the Committee sit will be furnished by the Secretary of the R. H. S., South Kensington, W.
- VI. **Cut Daffodil Flowers.**—In Spring we have numerous applications for these, but hitherto have been unable to attend to such, as the arrangement of the Daffodils was still incomplete. Now that the naming and arranging has been completed, we are prepared to send cut specimens at a charge of 3s. 6d. per dozen flowers (not less than one dozen), each cut specimen named. We estimate that this charge will cover all expenses of postage, boxes, labour, &c.
- VII. **Carriage by Rail** may be deducted at settlement of account, on orders for Bulbs to any Railway Station in the United Kingdom, and to all ports on the Irish Coast.
- VIII. **Orders paid in advance.**—If it is necessary to send such by Rail, carriage will be prepaid if requested, or, if not requested, a liberal equivalent in goods will be added.
- IX. **Packages.**—A small charge is made for these, and if returned within a fortnight, allowance made for the same. Returned empties should invariably have the sender's name on the address label for identification, and a notification sent by post stating date of dispatch and name of Railway Company.
- X. **Fruit and Forest Trees, Shrubs, Plants in Pots, Soils, Watson's Lawn Sand, Barr's Cut Flower and Fruit Conveyance Boxes, Barr's Improved Indoor Frames, Barr's Improved Hydropult Garden Engines**—on these we do not allow carriage.
- XI. **Five per cent.** may be deducted from accounts when paid within one month from date of invoice.
- XII. **Post Office Orders and Postal Orders** to be made payable at Post Office, Covent Garden, W.C. All cheques to be crossed, adding the words "and Co." Small amounts may be paid in Postage Stamps, when convenient by *Postal Order*, or eoin may be sent in a registered letter.

PARCELS POST.

BULBS POST PAID TO ALL PARTS OF THE THREE KINGDOMS.

The Parcels Post offers great facilities in forwarding small packages to families residing a considerable distance from London, or outside the radius of the Railway delivery. We shall in all cases use the **Parcels Post** when cheapest and the articles ordered weigh under eleven pounds, and admit of being packed for safe transmission by "Parcels Post." In the case of plants and heavy packages we shall send by Rail (*see par. VII.*)

~~and~~ Small orders required by Parcels Post should in all cases be accompanied by a remittance.

FOREIGN AND COLONIAL ORDERS.

- XIII. To insure attention, *Foreign and Colonial orders should be accompanied by a remittance, a draft, or an "order to pay," on a London agent.* The remittance being sufficient to cover expense of cases, and also of carriage when the freight is required to be paid in advance.
- XIV. Seeds and bulbs can now be despatched to India securely packed in tin or wooden boxes, at the rate of 1s. per lb., through the Indian Parcels Post, and also, by a recent arrangement, through the Post Office, at the rate of 1s. per lb. Prepaid Orders, with a margin for postage, we shall send through the Post Office when possible; Orders not prepaid, shall be sent by Indian Parcels Post.
- XV. In shipping plants to India, great care is exercised by us in selecting, preparing, and properly packing the same. Still, there are so many contingencies, that we cannot, in any way, hold ourselves responsible for the condition in which plants or bulbs reach their destination.
- XVI. Our experience in successfully preparing and shipping seeds and plants to India extends over a long period.

PURCHASERS of DAFFODILS, value 10s. 6d. and upwards, will be presented with a copy of "*Ye NARCISSUS OR DAFFODIL*."

[*Barr and Son,*

A FEW SPECIALITIES.

35	Barr's Beautiful Rainbow Mixture of Hyacinths, First Quality. A splendid mixture of Hyacinths which was specially arranged for by Mr. Barr when visiting one of the large Dutch Bulb Farms. The colours are evenly blended, and include red, scarlet, purple, lavender, porcelain, azure-blue, mauve, white, rose, blush, yellow, &c., very effective in flower beds and borders, per 100, 21s.; per doz. New Daffodils, valuable for out-door and indoor cultivation, see pages 9 to 16.	5 6
36	The Great Nonsuch Daffodil, mixed single yellow varieties, beautiful when naturalized in grass or planted in Woodland walks. The cut flowers are greatly prized for vases. The bulbs may, like the Hyacinth, be forced for early-flowering to cut for vases per 1000, 63s.; per 100, 7 6	7 6
37	The Scotch Garland Trumpet Daffodil, perianth white, trumpet yellow, extra large roots	7 6
38	The Tenby Trumpet Daffodil, perianth and trumpet yellow, extra large roots	21 0
39	The Gardenia-flowered Double White Daffodil, largest roots	7 6
40	The Great Campernelli Jougul, perianth and cup full yellow	6 6
41	Barr's No. 1 Great Golden-Yellow Crocus, each root gives 10 to 12 flowers...per 1000, 40s.; per 100, 5 6	5 6
42	New Species of Crocus, many of the varieties very rare, see page 19.	
42	Hyacinthus candicans (<i>the Great Snow-white Summer-flowering Hyacinth</i>). This is perhaps the most ornamental of summer-flowering hardy bulbs; it attains a height of 3 to 6 feet, surmounted with 20 to 50 graceful pendant bell-shaped flowers, and is equally decorative for the flower border and conservatory. Flowering bulbs, per 100, 15s., 21s., & 30s.; per doz., 2s. 6d., 3s. 6d., &	4 6
43	Colchicum speciosum rubrum. The largest, richest coloured, and most beautiful of Meadow-Saffrons, flowering profusely the latter part of September and early in October; per doz., 10/6; each	1 0
44	Colchicum autumnale, double, pure white, very rare, and exceedingly handsomeeach	3 6
45	Spiraea japonica fol. aureo-reticulatis (<i>the variegated-leaved Spirea</i>). Pure white feathery flowers, surmounted on red-tinted glossy stems, surrounded by an ample foliage of dark green leaflets, which are conspicuously traced throughout with golden-yellow veins.....per doz., 7s. 6d.; each	0 9
46	Chionodoxa luciliae (<i>the Glory of the Snow</i>). "At the lower level," says Mr. Maw, "it was out of flower, but near the summit of the mountain a mass was in full splendour, forming one of the most sumptuous displays of floral beauty I ever beheld; a mass of blue and white resembling Nemophila insignis in colour, but more intense and brilliant." The R. H. S. awarded to our specimen a First-Class Certificate, 1878.....Bulbs as collected, per 1000, 42s.; per 100, 5s. 6d.; per doz., 1 0	1 0
47	Chionodoxa luciliae (<i>the Glory of the Snow</i>) home-grown roots, per 100, 12s. 6d.; per doz., 2 0	2 0
48	Chionodoxa sardensis, introduced by us in 1883. A first-class certificate was awarded, Spring, 1885, to our plants by the R. H. S. J. G. writes thus in <i>The Garden</i> of 14th March:—"Chionodoxa sardensis is a gem among spring bulbs—one of the <i>rare really blue</i> flowers. Compared with C. luciliae . . . it is much brighter and deeper in colour, and a good sized patch is strikingly brilliant, the petals are blue nearly to the centre. This capital plant must become a great favourite."	
	Home-grown roots, per doz., 5s. 6d.; each	0 6
49	Chionodoxa sardensis, collected roots, amongst which there may be some of the beautiful Scilla bifolia, as they grow wild togetherper 1000, 50s.; per 100, 6s. 6d.; per doz.	1 0
50	Puschkinia libanotica compacta, white, shaded blue, $\frac{1}{2}$ ft.; first-class spring-flowering bulb, per doz.	5 6
51	Leucojum vernum, white, $\frac{3}{4}$ ft., Collected roots } <i>The Spring Snowflakes are</i> } per 100, 6s. 6d.; per doz.	1 0
52	" white, $\frac{3}{4}$ ft., English roots } <i>most beautiful plants</i> , } 10s. 6d.; "	1 0
53	Scilla sibirica. In early Spring the effect of the intense rich hyacinth-blue of Scilla sibirica is charming in beds, masses, or edgings. If grown 6 roots in a 4 or 5 inch pot it is a most desirable plant associated with early forced bulbs, per 100, 4s.; larger bulbs, per 100, 5s. 6d.	
54	Scilla bifolia. Collected on the Taurus Mountains, fine ultramarine-blue. A most charming plant out of doors, and beautiful in pots.....per 100, 5s. 6d.; per doz.	1 0
55	Iris reticulata, Sweet-Scented, for Early-Forcing, 3 to 6 bulbs in a pot. The brilliant deep violet, golden-blotted flowers of this beautiful Iris may be had under glass in January, per doz., 5s. 6d. &	7 6
56	Iris persica, Sweet-Scented, for Early-Forcing, 3 in a pot. The beautiful pearly blue infold with purple and gold flowers of this charming Iris may be had under glass in January and February, p. doz.	4 6
56	Allium neapolitanum, beautiful white flowers, much used in bouquets; quite hardy, p. 100, 5/6; p. doz.	1 0
57	Anemone fulgens. This is the most brilliant and graceful of all Winter and Spring-flowering anemones. The rich dazzling scarlet flowers, combined with a light elegant growth, render it the most attractive scarlet flower of SpringEnglish roots, per 100, 12s. 6d.; per doz.	2 0
58	Anemone fulgens græca, <i>deep rich scarlet</i> , most beautiful .. per 100, 16s. & 21s.; per doz., 2s. 6d. &	3 6
59	Anemone coronaria, Victoria Giant, a new race of single Poppy Anemones, of vigorous growth, and large saucer-shaped flowers, in great variety of shade and colourper 100, 5s. 6d.; per doz.	1 0
60	Anemone stellata "Jewel" (new), a very lovely and striking variety, flowers <i>ruby-violet, with glistening white centre</i> ,per 100, 21s.; per doz., 3 6	
61	Helleborus niger (<i>the Christmas Rose</i>), clumps to flower under glass each, 2s. 6d. &	3 6
62	Helleborus niger, plants according to size per doz., 5s. 6d., 7s. 6d., 10s. 6d. &	15 0
63	Helleborus orientalis punctatus (<i>the Purple-Flowered Spotted Eastern Lenten Rose</i>). A beautiful variety of the Caucasian Hellebore Strong clumps for pot-culture per doz., 15s.; each	1 6
64	Lapageria alba, a magnificent climber, producing in profusion bunches of snow-white flowers of great substance many months in successioneach, 7s. 6d., 10s. 6d., 15s., 21s., 42s., &	63 0
65	Heuchera Richardsoni. The leaves resemble a Zonal Geranium, but with a silky texture, and having a rich brown satin-like lustre. (Extra-sized plants, per doz., 10/6; each, 1/-); per doz., 7/6; each	0 9
66	Elwes' Giant Snowdrop, the largest and most beautiful of single Snowdrops, pure white segments, with rich green and white tubecollected roots, per 1000, 42s.; per 100, 5 6	
	The Plantain Lily, a fine foliaged hardy border plant, in many beautiful varieties, see page 22.	
	Iris Kämpferi (<i>The Japanese Clematis-like Iris</i>), a magnificent section of Iris, see page 24.	
	Paeonia, Double Chinese, in great variety and of great beauty, see page 37.	
	Paeonia, Double European, see page 38.	
	Paeonia, Single, many beautiful and rare species, see page 39.	

BARR'S PREPARED CHARCOAL AND COCOA FIBRE, adapted for growing Ferns in Plant Cases, and Bulbs in Jardinets, Glasses, etc. In using the Prepared Cocoa Nut Fibre and Charcoal in Hyacinth glasses, after the glass has been filled with the preparation, water should then be added till the preparation can absorb no more. On the glass place the Bulb so as partially to rest the lisse on the preparation, then tie it down with brown paper as you would a jam pot, leaving an opening in the centre of the paper for the shoot. When the Bulb has rooted well into the preparation, the paper may be removed, and care taken that the material in the glass is kept wet. No. 1 quality, 6/- per bushel; 2/- per peck. No. 2 quality, 4/- per bushel; 1/- per peck.

Any customer having a preference for collections of bulbs offered by other London houses—whether advertised in catalogues, daily papers, or other periodicals—the same may be had from us at the prices and terms of the advertisers.

King Street, Covent Garden, 1886.]

62 The Order Sheet which accompanies the Catalogue will facilitate the making out of a general order, as the marginal numbers on the Order Sheet correspond to the marginal numbers of the Catalogue, therefore it is simply necessary to fill in the quantities.

N.B.—The Marginal Numbers in the Catalogue are changed annually.

BARR'S HYACINTHS, IN TEN DISTINCT COLOURS, SPECIALLY SELECTED FOR OUT-DOOR CULTURE IN BEDS, RIBBONS, OR GROUPS.

When in Holland, Mr. Barr selected the 10 varieties of Hyacinths offered, as being distinct in colour, of fine habit, and having large flower spikes. They will also be found valuable for filling rustic baskets, flower boxes, and vases.

HYACINTHS IN MIXTURE FOR OUT-DOOR CULTURE IN BEDS, BORDERS, ETC.

For groups in flower borders and for filling beds, these mixed hyacinths are very effective.

131 "BARR'S BEAUTIFUL RAINBOW MIXTURE OF HYACINTHS."	This beautiful mixture of Hyacinths was specially arranged for by Mr. Barr on the occasion of his visit to one of the large Dutch Bulb Farms. The colours are evenly blended, including red, scarlet, purple, lavender, porcelain, azure-blue, mauve, white, rose, blush, yellow, &c., producing a fine effect in flower beds and borders.....	1st size bulbs, per 100, 21/-; per dozen	3 0

POMPON OR MINIATURE HYACINTHS.

These Miniature Hyacinths can be grown in small glasses, fancy pots, old china bowls, crystal dishes, jardiniets, etc., alone or associated with Scilla sibirica, Crocus, Snowdrops, Early Tulips, Narcissus nanus, Iris reticulata, etc., planted in "Barr & Son's Prepared Mixture of Charcoal and Cocoa Fibre" (2s. per peck, 6s. per bushel), the surface covered with fresh green carpet-moss.

In children's gardens and small flower beds, these Miniature Hyacinths, Scilla sibirica and bifolia, Spring Snowflakes, Narcissus nanus and Hoop Petticoat, Dog's Tooth Violets, Anemone fulgurans, Duc Van Thol Tulips, Tritelia, Crocus, Iris reticulata, Snowdrops, and Chionodoxa Luciliae intermingled, make a fine display, throughout the Spring months.

BULBS FOR EARLY FORCING.

143 Dwarf White Sweet-Scented Early Roman Hyacinth now universally prized in bouquets, and may be had in flower during October, November, and December. Pot the bulbs 3 to 6 in a pot at intervals during August, September, and October, then place out of doors on a bed of ashes and cover with 6 inches of cocoa fibre, there to remain till the bulbs are well rooted and have started at the top; the pots should then be placed in a moderately warm and moist temperature, and forced gently, water being given freely. 1st size, 15s. per 100, 2s. 6d. per doz.; 2nd size, 12s. 6d. per 100, 2s. per doz.

144 Paper White Early Narcissus, Sweet-Scented. A beautiful snow-white Narcissus, in flower with the Roman Hyacinth, and should be cultivated in the same way. 10s. 6d. per 100; 1s. 6d. per doz.

145 Double Roman Early Narcissus may be had in flower with the Paper White Narcissus. The individual blossoms are large, very double, and when used in small bouquets and for buttonholes, they are separately mounted. *Cultivation same as the Roman Hyacinth 11s. 6d. per 100; 1s. 9d. per doz.*

146 Blue Roman Early Hyacinth, flowers from a fortnight to three weeks later than the White Roman Hyacinth, and should be cultivated in the same way. 10s. 6d. per 100; 1s. 6d. per dozen.

147 Rosy White Early Roman Hyacinth, flowers from a fortnight to three weeks later than the White Roman Hyacinth, and should be cultivated in the same way. 10s. 6d. per 100, 1s. 6d. per doz.

148 Chionodoxa Luciliae (a High-Class Spring-flowering Bull), intense Nemophila blue, with large clear white centre. *Culture same as Roman Hyacinth. Home-grown roots, per 100, 1st size, 12s. 6d.; per doz., 2s.*

149 Single Duc Van Thol Tulips, scarlet-edged yellow, 30s. per 1000; 3s. 6d. per 100; 3d. per doz.)

150 " " " scarlet 4s. 6d. per 100; 9d. per doz.

151 " " " rose, 10s. 6d. per 100; 1s. 6d. per doz.

152 " " " yellow, 10s. 6d. per 100; 1s. 6d. per doz.

153 " " " white, 16s. per 100; 2s. 6d. per doz.

154 *Scilla sibirica*, (very large roots), intense rich hyacinth-blue, 5s. 6d. per 100; 1s. per doz.

155 *Elwes' Giant Single Snowdrop*, home-grown, 10s. 6d. per 100; 1s. 6d. per doz.

156 *Iris reticulata* (violet-scented), intense violet-blue, blotched golden-yellow, 5s/- per 100; 7s/6d. per doz.

157 *Iris Persica* (violet-scented), pearl-blue, inlaid purple and gold, 4s. 6d. per doz.

at Barr's Prepared Mixture of Charcoal and Cocoa Fibre is recommended when Bulbs are grown in sitting rooms, 2s. per peck; 6s. per bushel.

Cultivation same as White Roman Hyacinth.

[Barr and Son.]

HYACINTHS.

FOR CULTURE IN GLASSES, JARDINETS, POTS, AND FOR EXHIBITION.

637 The * indicates the best varieties for early forcing in pots, and for growing in glasses, jardinets, &c.

CULTURE.—Immediately the Hyacinth is potted, which may be done from September to December, *place the pots out of doors on a bed of ashes*, and cover with six inches of the same material, but a covering of cocoa fibre is preferable if it can be had; then the bulbs should remain exposed to all weathers until the pots are full of roots and the top sprouted about an inch, this will be in about eight or ten weeks. A portion may then be removed indoors, and if forced, should be done gently in a moist atmosphere, and plentifully watered at the roots. To maintain a succession, remove indoors a portion once a fortnight. If finely developed trusses and rich colours are preferred to very early flowers, the Hyacinth should not be forced, but when brought indoors be placed on the shelf of a greenhouse, in a sitting-room window, or in a cold frame, close to the glass, always in the most genial and sunniest situation at command, and the plants allowed to develop their flowers gradually and naturally, water being given regularly and freely, as it is well known to professional cultivators that failures, for the most part with Hyacinths, arise from allowing the *soil to become dry*. Abundance of air is necessary, and a moderately moist atmosphere; a dry atmosphere and a draughty situation cause the flower buds to shrivel.

If the Hyacinth is grown in glasses, the base of the bulb should just touch the water, and a little charcoal placed in the glass to keep the water sweet. It is, however, preferable to fill the glasses with the prepared Mixture of Charcoal and Cocoa Fibre (see bottom of page 3 for directions). Place the glasses in a room without a fire, or, better still, in the shady part of a greenhouse, and when the glass is full of roots and the plant has made a little top growth, then place it in the sunniest situation at command till the flower spike is well developed; when the glasses may be removed to where the flowers are to be enjoyed. Avoid a dry atmosphere or draughty situation, as these often cause the flower buds to shrivel.

When cultivated in jardinets, the Hyacinth may be associated with other early-flowering bulbs, such as Scilla sibirica, Tulips, Snowdrops, Crocus, Narcissus, Iris reticulata, &c. Barr & Son's prepared Mixture of "Charcoal and Cocoa Fibre" should invariably be used (see bottom of page 3 for directions); the preparation must always be kept moist, and when the jardinet is removed to the sitting-room the surface should be covered with fresh green carpet moss.

The † denotes varieties with double flowers. These, except those with semi-double flowers, are unsuitable for growing in glasses and jardinets, or for forcing. The finest of the double varieties we have enumerated, and recommend them to be grown in pots.

The "ex" indicates the sorts which produce the largest and most perfect flower spikes, and those who cultivate the Hyacinth for exhibition should select from these.

OUR OWN SELECTIONS.

The varieties of Hyacinths described, and included in the collections are those which Mr. Barr personally selected during the many visits of inspection he has made to the bulb farms of Holland, and which from experience have proved the most worthy of cultivation.

When an order is given for any of the under-mentioned "Selections," and it is stated they are for glasses, jardinets, or exhibition, single kinds will be sent. If this is not specified, the selection will include a proportion of double varieties.

638 Several familiar sorts are omitted, the bulbs either did not make a satisfactory growth this year, or they are superseded by finer varieties, to this subject we annually give special attention.

[Barr and Son,

BARR'S HARDY DAFFODILS, DAFFADILLIES, DAFFODOWNDILLIES.

*& Naming cut specimens of Daffodils, see Paragraph 5, Special Notices, page 2.**Sending cut specimens of Daffodils*

The New Daffodils are distinguished by *, those recently re-introduced by **. To raise New Daffodils is the work of many years, and those now offered were raised by amateurs who have long since passed from our midst, but who have left behind them glorious memories, not of ephemeral productions, but "things of beauty" that will enrich our flower gardens for centuries, as the older Daffodils have done from the most remote periods. Those who desire to acquaint themselves with the literature, poetry, and hybridization of Daffodils, we refer to "*Ye Narcissus or Daffodyl*," by W. F. B. and P. B." Price 1s. by Post. Purchasers of Daffodils to the value of 10s. 6d. and upwards will have a copy of above work enclosed in their package.

The Daffodils or *Narcissi* enumerated and described in the following pages comprise all the finest sorts known in cultivation. They are for the most part new English varieties and hybrids with a few recent re-introductions from the Pyrenees, etc., collected together by Mr. Barr during the past twenty years. The new English varieties were named by the Committee appointed at the Daffodil Conference, held 1st April, 1884, in the Large Conservatory, South Kensington, under the auspices of the Royal Horticultural Society.

To assist amateurs in making their own selections of these hardy and beautiful spring flowers, they have been arranged in groups, each group representing a distinct feature in the formation of the flower. It is, therefore, only necessary to make a selection from each group to possess representatives of the family.

CULTURE AND ADAPTATION.—The Daffodil may be grown in any soil and situation, but it thrives best in a fertile loam. In planting, the top of the bulb should be two to three inches below the surface, according to the size of the bulb; but when in permanent beds, etc., and summer flowers are cultivated over the bulbs, plant at a depth of six or nine inches; the strongest growing Daffodils should be selected for such purposes. In beds the large flowering Daffodils are charming, and for edgings the dwarf growing kinds, such as *Nanus*, are most beautiful. In flower borders and shrubberies, groups of Daffodils look splendid. For naturalization in woodland walks, semi-wild places, on the margins of lakes, streams, and plantations, and also amongst grass, no hardy flower looks so natural and pleasing as the Daffodil.

CULTURE AND ADAPTATION INDOORS.—If for decoration, use, say three bulbs in a 4 or 5-inch pot, if for cutting, plant thickly in boxes 15 inches by 10, and 5 to 6 inches deep, using ordinary potting soil. *The pots or boxes should then be placed out of doors on a bed of ashes*, and covered with 6 inches of the same material, or with cocoa fibre, which is preferable, if it can be had. The pots or boxes should remain out of doors till full of roots and top growth has commenced. Portions may then be removed indoors in succession, and placed in a moist forcing-house and plentifully supplied with water.

Cut blooms of Daffodils are most elegant in vases, and are in abundance at a season when other flowers are scarce. They also supplement and mix admirably with hot-house flowers. For three months in Spring cut flowers from our collection of Daffodils are exhibited by us at the various Spring Shows and Fortnightly Meetings of the Royal Horticultural Society, and the Spring Flower Shows of the Royal Botanic and Crystal Palace.

~~W~~ Daffodils seeded with unusual freedom last Spring all over the country. It is to be hoped advantage was largely taken of the circumstance by amateurs with fine collections. At Tooting seed was saved, but in most cases we removed the seed pods, that the strength of the bulb should not be diminished. This seed we offer at 1s. and 2s. 6d. per packet.

GROUP I.—MAGNI-CORONATI OF BAKER.

Ajax of Salisbury, Haworth, and Herbert, Pseudo-Narcissus of Parkinson, and includes *Corbularia* (*Bulbocodium*), (Hoop Petticoat, or Medusa's Trumpet).

DISTINGUISHING CHARACTER.—*Crown or trumpet as long or rather longer than the divisions of the perianth.*

The first systematic arrangement of this family is found in Parkinson's "Paradisi in Sole Paradisus Terrestris; or, A Garden of All Sorts of Pleasant Flowers," published 1629. Haworth, in November, 1831, published the revised edition of his *Narcissus Monograph*, and about the same time Dean Herbert embodied in his "Amaryllidaceæ" the result of his study of the genus *Narcissus* from living plants. Baker's review of the genus *Narcissus* appeared in the *Gardeners' Chronicle*, 1870. Burbidge's "History and Culture," with coloured plates and descriptions of all known species and principal varieties of *Narcissus*, written in a charming style, tracing the literature of the Daffodil back to 1570, was published in 1875; Mr. Barr, at this date, was working into form the Longford Bridge and Wcardale hybrids and varieties, so that only a very few of these are mentioned in Burbidge's book. "Ye Narcissus or Daffodyl," by F. W. B. and P. B., may be considered a supplement to Mr. Burbidge's illustrated work, as it brings up Daffodil lore to 1884, with a complete descriptive list of all *Narcissus*—ancient and modern.

The Trumpet Daffodils, Group I., flower in the following succession: Pallidus Precox, Parkinson's "Beautiful Sulphur Daffodil," from January; Cambrius and Obvallaris from February, closely followed by Nanus, Minor, Spurius, Blondin, the English Lent Lily, the early-flowering varieties of Bicolor, viz., Horsfieldi, Empress, etc., which are followed by Emperor, Maximus, Major, Rugilobus, Bicolors—Grandis, Dean Herbert, Michael Foster, James Walker, J. B. M. Camm; Princeps, and the large white trumpets.

The Grand Trumpeters include all the large trumpet varieties of Bicolor, Emperor, Maximus, Major, Princeps, Rugilobus, varieties of Spurius, Blondin, Telamonius, Dean Herbert, Michael Foster, James Walker, the two Camms, the two Burbidges, Dr. Hogg, St. Brigid, John Nelson, Capt. Nelson, Shirley Hibberd, William Goldring, Cernuus pulcher, Hudibras, Exquisite, etc.

All the Trumpet Daffodils are prized for pot culture, flowering under glass with the Hyacinth, and should be cultivated in the same way, three bulbs at least in a 4 to 5-inch pot. The cut flowers are much in demand for bouquets and vases.

NARCISSUS CORBULARIA (*Bulbocodium*).

THE NONSUCH OR MOCK-DAFFODIL, OR NARCISSUS.

GROUP II.—MEDI-CORONATI OF BAKER.

Queltia, Philogyne, etc., of Salisbury, Haworth, and Herbert; Peerless, Nonsuch, Chalice-Shaped Crown, etc., of Parkinson.

DISTINGUISHING CHARACTER.—*Crown or cup half as long as the divisions of the perianth, but in one or two cases three-quarters as long.*

It is now accepted that the varieties in this group are hybrids, excepting *Triandrus* (syn. *Calathinus* and *Reflexus*), *Odorus*, and *Juncifolius*, which are considered species. It is true, *Incomparabilis* is found wild in France and Spain, but Dean Herbert, Leeds, and Backhouse produced it by crossing *Poeticus* with a Trumpet Daffodil. Macleai is considered by Mr. Baker between a *Tazetta* and a Trumpet Daffodil. Although we have no positive data as to the parentage of the new hybrids and varieties described in this group, we think it may fairly be assumed that *Poeticus* and the Trumpet Daffodils gave all the varieties of *Incomparabilis*; *Poeticus* and *Incomparabilis* would give *Barrii*, which may be described generally as smaller forms of *Incomparabilis*; *Poeticus* and *Cernuus* or *Albicans*, gave the varieties of *Leedsii*, "the Eucharis-like Daffodil," which has the perianth white, and the crown white, or primrose. *Poeticus*, or perhaps *Tazetta*, and *Bicolor* would give *Nelsoni*, *Backhousei*, and *Tridymus*.

The varieties in this group commence flowering in March, and furnish a succession till May. They are all of great beauty, and as cut flowers are extensively used for furnishing vases and table bouquets.

All the varieties enumerated in Group II. are prized for pot-culture flowering under glass with the *Hyacinth*, and should be cultivated in the same way, three bulbs at least in a 4 to 5-inch pot. The cut flowers in this group are much in demand for bouquets and vases.

NARCISSUS INCOMPARABILIS
(*Queltia*).

SHORTENED CHALICE-CUP HYBRID DAFFODILS.

Barr's Yellow Hybrid Daffodils.

467 *1. Barrii, perianth and cup yellow, going off primrose	5 6...0 6
468 *Conspicuous, large broad spreading perianth, yellow, going off sulphur, broad short cup conspicuously stained orange-scarlet, a remarkable flower of great beauty	21 0...2 0
469 *Dwarf Golden Mary, perianth yellow, passing to primrose, cup yellow	per 100, 7s. 6d. 1 6...0 3
470 *Golden Gem, perianth rich full yellow passing to primrose, cup yellow, edged orange	5 6...0 6
471 *Lass o' Gowrie, perianth sulphury and starry, cup yellow	5 6...0 6
472 *Orphée (conspicuous minor), perianth primrose, passing to sulphur, cup yellow edged orange	10 6...1 0

Barr's Sulphur-coloured Hybrid Daffodils.

473 *2. Sulphureus, perianth primrose, cup yellow	per 100, 15s. 2 6...0 3
474 *Imogen, perianth sulphur, cup yellow and expanded	5 6...0 6
475 *Mimico, perianth sulphur, cup yellow, very fine	per 100, 25s. 3 6...0 4

Barr's Peerless Hybrid Daffodils.

3. Barrii albidus,	
476 *Ada, perianth sulphury white, cup yellow	per 100, 21s. 3 6...0 4
477 *Beatrice Murray, perianth creamy white, cup canary elegantly edged with orange; very distinct	6 6...0 8
478 *Cinderella, perianth white, cup sulphur tinged orange; very neat	6 6...0 8
479 *General Murray, broad creamy white perianth, canary cup, elegantly edged orange, very distinct	15 0...1 6
480 *Jewel, perianth sulphur-white, small yellow cup	7 6...0 9
481 *John Stephenson, perianth sulphury white, cup large, spreading, yellow	6 6...0 8
482 *Maurice Vilmore, perianth broad, creamy white, cup lemon, conspicuously stained with orange-scarlet; very distinct	10 6...1 0
483 *Miriam Barton, perianth primrose, large canary cup	7 6...0 9
484 *Piccio, starry perianth creamy white, cup yellow stained orange	15 0...1 6
485 *Romeo, perianth creamy white, dog-eared, cup canary; very distinct	10 6...1 0
486 *Vivian, twisted sulphur perianth, cup yellow	10 6...1 0

Barr's Peerless White Hybrid Daffodils.

487 4. *Barrii albus, perianth pure white, cup yellow, tinged orange 2 6
--	-------------

King Street, Covent Garden, 1886.]

BARR'S WHITE HYBRID DAFFODILS—continued.

488 *Flora Wilson, large pure white perianth, cup canary, strongly edged with scarlet	s. d. s. d. 21 0...2 0
489 *Sensation, large pure white perianth, cup canary conspicuously edged orange-scarlet, very striking flower 3 6
490 *William Ingram, perianth white, elegant primrose cup, conspicuously stained orange-scarlet	15 0...1 6

NARCISSUS LEEDSII.

Leeds' Eucharis-flowered chalice-cup White Hybrid Daffodils.

491 *Leedsii, perianth white and somewhat starry, cup lemon changing to white	7 6...0 9
492 *Amabilis, perianth large, white and spreading, cup long and conspicuous, passing from primrose to white	7 6...0 9
493 *Acis, perianth white, elegant cup stained orange, changing to white	10 6...1 0
494 *Albion, perianth white, large and starry, cup canary	10 6...1 0
495 *Aladdin, perianth white, cup lemon 1 6
496 *Arsinöe, perianth white, cup canary, medium-sized flower	10 6...1 0
497 *Beatrice, perianth white, fine form, cup remarkably elegant, changing from lemon to white. Of the white hybrids this is the purest, and possesses the highest type of beauty 5 6
498 *Cybele, perianth white and drooping, cup changing from orange to primrose 2 6
499 *Duchess of Brabant, perianth white, cup canary	7 6...0 9
500 *Duchess of Westminster, large white perianth, long canary cup tinged orange on first expanding, distinct and very handsome 21 0
501 *Elegans, true, perianth white, large drooping, and somewhat shouldered, long primrose cup, sometimes stained apricot, very distinct. (Figured Gardener's Magazine of Botany) 5 6
502 *Fanny Mason, perianth white, cup canary; medium-sized flower	10 6...1 0
503 *Flora, perianth white, cup stained orange; on first opening the flowers are drooping	21 0...2 0
504 *Gem, white, very beautiful 3 6
505 *Ianthe, perianth white, cup canary; medium-sized flower	10 6...1 0
506 *Katherine Spurrell, perianth white, broad, and overlapping, cup canary; large flower very distinct 3 6
507 *Madge Matthew, large white perianth, elegant cup passing from canary to primrose 10 6
508 *Mrs. Langtry, perianth white and broad, large white cup; a very distinct flower 10 6
509 *Minnie Hume, perianth white and large, cup large and spreading, changing from canary to white; a handsome variety. 1st Cl. Certificate 3 6
510 *Maria Magdaline de Graaff, perianth white, cup suffused orange; usually 2-flowered; very distinct in flower and foliage, the latter is broad and drooping 5 6
511 *Queen of England, large white perianth, with large expanded canary cup, style of Minnie Hume	25 0...2 6
512 *Superbus, perianth white, large, and dog-eared, cup passing from primrose to white	15 0...1 6

NARCISSUS HUMEI.

Hume's Dog-eared Hybrid Daffodils.

513 *Hume's Sulphur, perianth sulphury white, trumpet yellow, a very distinct plant	per 100, 15s. 2 6...0 3
---	-------------------------

14 BACKHOUSEI, MONTANUS, NELSONI, TRIDYMUS, ODORUS, ETC., DAFFODILS.

NARCISSUS HUMEI—continued.	per doz. each
514 *Hume's Concolor, perianth and s. d. s. d. trumpet uniform yellow, a very re- markable hybrid	21 0...2 0
515 *Hume's Giant, perianth yellow changing to sulphur, trumpet yel- low; flower very large and of ex- traordinary character	21 0...2 0
NARCISSUS BACKHOUSEI.	
Backhouse's Hybrid Daffodil, with coffee-cup- shaped crown.	
516 *Backhousei, bold habit; flowers horizontal with distinct basal tube, and long yellow cup nearly equalling the spreading sulphury perianth 5 6
517 *Backhousei, Wolley Dod, large spreading primrose perianth and short deep yellow trumpet, a very distinct handsome daffodil 21 0
518 *Backhousei William Wilks, closely imbricated spreading primrose perianth, with striking orange- yellow trumpet, frilled at the brim 10 6...1 0	
NARCISSUS MONTANUS.	
Mountain Daffodil, with coffee-cup-shaped crown.	
519 Montanus, 1 to 2-flowered; flowers nodding, white, with a long slender cylindrical tube, and a straight- sided cup, about half as long as the spreading, twisted, somewhat drooping perianth	21 0...2 0
NARCISSUS MACLEAI (<i>Diomedes</i>).	
Macleai's Miniature Bicolor Daffodil.	
520 Macleai, 1 to 2-flowered; flowers small, horizontal, with short tube, spreading white perianth, and cylindrical yellow cup, p. 100, 15s. 2 6...0 3	
NARCISSUS NELSONI.	
Nelson's Daffodils, with goblet-shaped crown.	
521 *Major, perianth white and large, cup yellow and straight, usually suffused orange on first opening ...	15 0...1 6
522 *Minor, perianth white, cup yellow, small flower and comparatively dwarf; distinguished by pistil pro- jecting beyond mouth of the cup ...	21 0...2 0
523 *Pulchellus, perianth white, cup yellow; distinguished by the cam- panulate shape of the imbricated perianth; flower somewhat droop- ing on first opening	21 0...2 0
524 *William Backhouse, perianth white, cup yellow; this is evidently the same cross as Nelsoni major, with- out any colouring matter, thus showing that Mr. Leeds and Mr. Backhouse made their crosses with similar flowers	21 0...2 0
NARCISSUS TRIDYMUS.	
Triple-crown Hybrid Daffodils.	
Tridymus, near Nelsoni, but with a somewhat more obconical tube, 1 to 3 usually 2-flowered; flowers varying much in size.	
525 *Tridymus, perianth and cup yellow; plant somewhat recumbent 5 6
526 *Duke of Albany, perianth sulphur, cup orange 5 6
NARCISSUS TRIDYMUS—contd.	per doz. each
527 *Duchess of Albany, perianth sul- phur, cup yellow	s. d. s. d. ... 5 6
528 *S. A. de Graaff, large bold yellow well imbricated flowers changing to primrose, cup yellow 5 6
NARCISSUS ODORUS (<i>Philocyne</i>).	
The Large Yellow Jonquil-like Daffodil.	
529 Odorus (the great 6-lobed), rich full yellow	per 100, 10s. 6d. 1 6...0 3
530 Campernelle, perianth and cup full yellow	per 100, 6s. 6d. 1 0...0 3
531 Rugulosus (the great wrinkled yellow cup), broad imbricated perianth, full yellow, p. 100, 10/6 1 6...0 3	
NARCISSUS JUNCIFOLIUS.	
The Least Rnsh-leaved Daffodils.	
532 Juncifolius, flowers variable in size and shape of cup, a slender dwarf species, with small full yellow flowers 3	6...0 4
533 *Rupicola, full yellow, cup more spreading, and quite distinct from the type <i>Juncifolius</i>	7 6...0 9
NARCISSUS TRIANDRUS (<i>Ganymedes</i>).	
The Cyclamen-flowered Daffodil.	
This elegant Daffodil has been variously named by botanical authorities <i>Triandrus</i> , <i>Reflexus</i> , and <i>Calathinus</i> . We propose to adopt <i>Triandrus</i> , it is Linnaeus's name.	
534 *Triandrus albus (<i>Angel's tears</i>) flowers variable in size, pure white, cup about three-quarters the length of divisions of the perianth	5 6...0 6
535 Triandrus pallidulus	15 0...1 6
536 Triandrus pulchellus true, prim- rose perianth, cup white 2 6
NARCISSUS INCOMPARABILIS PLENUS.	
The Double-flowered Nonsuch & Peerless Daffodils.	
537 Aurantius plenus (Butter and Eggs), double sulphur, Nonsuch Daffodil, with orange nectary, per 100, 6s. 6d. 1 0...0 3	
538 Aurantius plenus (Butter and Eggs, Golden Phoenix), double yellow Nonsuch Daffodil, with orange nectary	per 100, 7s. 6d. 1 3...0 3
539 Albus plenus aurantius (Eggs and Bacon, Orange Phoenix), double white Peerless Daffodil, with orange nectary	per 100, 12s. 6d. 2 0...0 3
540 Albus plenus sulphureus (Cod- lings and Cream, Sulphur Phoenix), the double white Peerless Daffodil, with sulphur nectary, per 100, 35s. 5 0...0 6	
NARCISSUS ODORUS DOUBLE.	
Queen Ann's Double Jonquil.	
541 Odorus plenus, rich full yellow double flowers	7 6...0 9
542 Odorus minor plenus, flowers of a rich full yellow, more compact and neater than 541, not unlike a small very double yellow rose	5 6...0 6

GROUP III.—PARVI-CORONATI OF BAKER.

The Small-crowned Daffodil or True Narcissus. Under this heading are included

Polyanthus or many-flowered Narcissus (*Hermione* and *Helena* of Haworth); Bisforus (the Primrose-Peerless); Poeticus (the Purple-ringed Daffodil); and Jonquilla, the Sweet-smelling Jonquil.

DISTINGUISHING CHARACTER.—Crown less than half as long as the divisions of the perianth.

In this series Poeticus (the purple-ringed Daffodil) is considered the true Narcissus; Bisforus is Parkinson's Primrose-Peerless; Burbidgei is a hybrid, one remove from Poeticus, and is the connecting link between [Barr and Son,

Groups II. and III. (See Coloured Plate in "The Garden," 1880.) Gracilis and Tenuior are the Helena of Haworth ; Jonquil, the Jonquilla of Linneus ; Polyanthus Narcissus, the Hermione of Haworth and Tazetta of Sibthorp.

The early Poeticus commence flowering in March, and the late-flowering close the Daffodil season in June. Burbidge's hybrids of Poeticus flower in succession from March to middle of May. Gracilis, Schizanthes Orientalis, and the Double White Gardenia-flowered Daffodil, are among the latest to bloom.

All the Daffodils in this Group are good pot-plants for under glass or for the sitting-room window with the Hyacinth, and should be cultivated in the same way, with three bulbs at least in a pot. The cut flowers of this section are greatly in demand for bouquets and vases.

NARCISSUS BURBIDGEI.

Burbidge's Hybrid Poet's Daffodil.

The Burbidgei varieties give a succession of flowers from March to middle of May, commencing before Poeticus ornatus, and following the one after the other in succession to middle of May. All valuable as cut flowers.

543	*Burbdigei, perianth clear white, cup margined with cinnabar-red, very early	per doz. each.
544	*Agnes Barr, perianth creamy white, cup yellow.....	2 0...0 3
545	*Boz, perianth yellow, cup citron, and plaited	10 6...1 0
546	*Conopeicus, perianth white, cup expanded and conspicuously edged with orange-scarlet.....	3 6...0 4
547	*Dandy, perianth white, cup yellow, plaited	5 6...0 6
548	*Edith Bell, perianth alabaster-white changing to pure white, cup canary margined with orange, very distinct	3 6...0 4
549	*Ethel, perianth primrose, cup yellow	7 6...0 9
550	*Falstaff, perianth white, cup lemon	5 6...0 6
551	*Gracilis, perianth sulphur-white, cup spreading, plaited and tinted with orange	7 6...0 9
552	*Guinever, perianth white and compact, cup canary and frilled	7 6...0 9
553	*Johanna, perianth white, cup spreading and stained orange	10 6...1 0
554	*John Bain, perianth large white, cup citron	5 6...0 6
555	*Little Dirk, short, neat, compact perianth, passing from yellow to creamy white, cup conspicuously edged orange-scarlet, the smallest of the group, very beautiful 3 6
556	*Little John, perianth compact, creamy white passing to white, cup small yellow, plaited	5 6...0 6
557	*Mary, perianth white, cup expanded and suffused with orange	4 6...0 6
558	*Model, perianth clear white and compact, cup frilled and stained with orange	10 6...1 0
559	*Ossian, perianth white, large and broad expanding yellow cup	10 6...1 0
560	*Primrose Star, perianth primrose and neat, cup yellow, per 100, 30s.	4 6...0 6
561	*Robin Hood, perianth white, cup lemon stained with orange	4 6...0 6
562	*Sulphur Star, perianth sulphur-white, cup canary edged with orange	4 6...0 6
563	*Vanessa, neat compact yellow perianth passing to primrose, cup yellow and expanded, a perfect flower	10 6...1 0

NARCISSUS POETICUS.

The Purple-ringed Poet's Daffodil.

Poeticus divides naturally into early and late-flowering varieties, a circumstance which is not generally known. It is from the early section, especially P. ornatus, that Covent Garden is supplied with forced cut flowers of the Poet's Narcissus from January to March.

March and April Early-flowering Poeticus.

564	Angustifolius (radiflorus), perianth pure white, cup narrowly margined orange-red, per 100, 10s. 6d.	1 6...0 3
-----	---	-----------

King Street, Covent Garden, 1886.]

POETICUS—continued.

		per doz. s. d. s. d.	each. s. d. s. d.
565	Ornatus, perianth pure white, broad and well formed, cup margined with scarlet	per 100, 12s. 6d.	2 0...0 3

606	Phyllis, perianth yellow, cup orange	4	6..0	6
607	Sir Isaac Newton, perianth yellow, cup orange	4	6..0	6

Double-flowering Polyanthus Narcissus.

608	Double Roman Narcissus, double white with orange nectary. This variety is much grown for early-forcing. The individual pips are mounted and used in buttonhole bouquets, etc.	per 100, 11s. 6d.	1	9..0	3
609	Nobilissimus, double white with yellow centre	5	6..0	6	

THE TULIP.

The Tulip is extremely hardy, and of easy culture, flowering as freely in the shade as in the sunshine, and producing as fine flowers in a confined town garden, as in more favoured places. Double and single Tulips, when mixed together and planted in front of shrubs, maintain a longer display, than if either are separately planted. In gardens where the flower beds must be kept gay from the earliest dawn of Spring, plant between the lines of Tulips, Scilla sibirica, Chionodoxa luciliae, Snowdrops, or Crocus, and as these flower first, they can be removed or cut down when the Tulip is coming into bloom.

EARLY SINGLE TULIPS.

The Early Single Tulip has a greater variety of rich, delicate, and attractive colours than any other section of spring-flowering bulbs. Those alone who have massed the different varieties, planting the bulbs 5 inches apart, can form an idea of their beauty and great diversity in shade and colour and the grand effect produced in flower beds, or grouped in borders. The Early Single Tulip is extensively used for indoor decoration, three bulbs in a pot, and cultivated in the same way as the Hyacinth. See page 7.

EARLY DOUBLE TULIPS.

Double Tulips have massive flowers of brilliant, diversified, and beautiful colours, and are suitable for beds on the lawn, terrace, etc., also as edgings to Rose beds and shrubberies. Planted in groups of three or more in flower and shrubbery borders, they are very effective.

The * indicates the best sorts for pot-culture. For sectional lines, when the Early Single Tulip is planted in designs, the Tournesol, No. 688, is most valuable; it is also the best to force for early-flowering, and is extensively grown for Covent Garden Market. Imperator Rubrorum is the best scarlet, and Tournesol Yellow the best of the yellows. For indoor decoration, the Double Tulip should be planted three bulbs in a pot, and receive the same cultural treatment as the Hyacinth. For beds or masses, Rex Rubrorum, scarlet, is the best to associate with La Candeour, white, and, so arranged, the effect is unrivalled amongst Spring flowers. Plant the bulbs six inches apart.

CROCUS.

The Crocus is one of the earliest flowers of Spring, and occupies a prominent place in every garden. When planted as an edging in triple lines of one or more colours, the effect is striking. No Spring display surpasses that of broad wavy bands of golden-yellow, of striped, of purple, or of pure white Crocus, when they expand their blossoms in February and March. In lawns and pleasure parks, planted in the grass the Crocus is extremely effective. For several years past in "Rotten Row," and other parts of the Royal Parks, Crocus, Snowdrops, Daffodils, &c., have been planted in the grass, to the great delight of visitors, and the enhanced decoration of the parks. In wild gardens, woodland walks, etc., the Crocus should be associated with the violet, the primrose, and the oxlip.

CHEAP DUTCH CROCUS.

To encourage extensive planting in shrubberies, woodlands, wild gardens, in grass, on lawns, pleasure parks, etc., Crocus are quoted by the thousand cheaply. One season, at the lower grounds, Aston, about 50,000 Golden-Yellow Crocus were used to edge off beds cut in the grass, and the gorgeous effect produced in February and March was such the skill of the artist failed to portray it. On another occasion, 20,000 purple, white, and striped Crocus were planted in alternate lines with Early Tulips.

CHOICE NAMED DUTCH CROCUS. LARGE ROOTS.

The following large-flowered named Crocus are recommended for planting in groups, edgings, select beds, and in designs. There are purples and blues of shades, pure whites, rich yellow, light and dark, striped sorts, &c. When the crocus is grown in pots, plant thickly, and treat as recommended for the cultivation of the Hyacinth in pots, on page 7. When removed from under the ashes, place in an airy situation, and give water very freely.

CHOICE SPECIES OF CROCUS, AUTUMN, WINTER, AND SPRING-FLOWERING.

The Crocus enumerated under this heading are beautiful, and more or less rare, and to the cultivators of hardy flowers most valuable, as the Autumn and Winter-flowering species form a connecting link between the bulbous plants of Summer and those of Spring. In our Experimental Grounds we have one or other of these Crocus in bloom from September to April. The first to flower in September is *C. nudiflorus*, with large violet-purple blossoms, followed by *Speciosus*, the blue Crocus, and the beautiful soft rose-lilac flowers of *C. odorus longiflorus*.

[Barr and Son,

CHOICE SPECIES OF CROCUS—continued.

SNOWDROP (GALANTHUS NIVALIS).

In the early Spring months, there is nothing more beautiful than a sheet of the snowy graceful blossoms of the Snowdrop. In planting an edging, mass, or a bed, whether under the turf of the lawn or in the flower garden, the bulbs should almost touch each other. A bed of surpassing beauty may be arranged, Snowdrops in the centre, with a deep fringe of bright blue *Scilla sibirica*, or *Chionodoxa Luciliae*; a charming effect is also produced by intermingling in the proportions of two-thirds Snowdrops to one-third *Scilla sibirica* or *Chionodoxa Luciliae*. When practicable such plantings of the Snowdrop should be permanent, and the surface of the soil in Summer, top dressed and sown with annuals, such as *Nemophila*, *Leptosiphon rosea*, etc., or surface rooting bedding plants. The Snowdrop and the Crocus when planted in alternate circles are very effective, and follow each other so closely, that no gap is left in the succession.

In beds of Tulips and Hyacinths, Snowdrops are very effective between the lines, they flower while these bulbs are just moving the surface, and after flowering there remains an elegant groundwork of green foliage.

The Snowdrop is most generally used as a permanent edging, and in masses, or in the fringes of lawns, where the grass need not be cut till May, and in pleasure parks; in such places, nestling in the grass, the Snowdrop looks charming. In planting, the turf need not be disturbed, but holes five inches deep should be made with a dibber, dropping in two inches of fresh soil, then three or more bulbs, keeping the holes about three inches apart. Snowdrops when planted on banks and grass slopes look lovely. *The New Giant Single Snowdrop, Galanthus Elwessii*, should be extensively used, the flowers are large and most valuable for cutting. The *Chionodoxa Luciliae* is a charming companion to this Snowdrop; both are found wild together, and as nature is never found out of harmony, the information may be suggestive to those who follow natural arrangements in their garden.

WINTER ACONITE.

Early in Spring the golden blossoms of the Winter Aconite look charming, resting on an emerald-green cushion of leaves and forming a striking contrast to the pure white Snowdrop, the lovely blue Scilla sibirica and *bifolia*, *Chionodoxa Luciliae*, and the Spring Snowflake. The green carpet of foliage remains long after the flowers, and thus makes the plant valuable, especially in situations where it is difficult to clothe the ground, such as under trees, and in moist situations, which the Winter Aconite enjoys, and where few other flowering plants will thrive.

818 Winter Aconite, golden-yellow, per doz., 6d.; per 100, 2s. 6d., large roots 3s. 6d.; per 1000, 21s. & 30s.

CHIONODOXA LUCILIÆ (*The Glory of the Snow*).

- 819 Chionodoxa Luciliae** (*The Glory of the Snow*). Mr. Maw, in describing the circumstances under which he found the Chionodoxa Luciliae, says, "At the lower level it was out of flower, but near the summit of the mountain a mass was met with in full splendour, forming one of the most sumptuous displays of floral beauty I ever beheld; a mass of blue and white resembling Nemophila insignis in colour, but more intense and brilliant." The Chionodoxa Luciliae was figured in *The Garden*, July 3rd, 1880, and in 1878 the Floral Committee of the R. H. S. awarded to our specimen a First Class Certificate. *Collected roots*, amongst which will be found a percentage of a beautiful variety of *Scilla bifolia*; the two plants grow together, and although great care is taken to separate them, there yet remains some of the *Scilla*, per 1000, 42s.; per 100, 5s. 6d.; per dozen, 1s.

820 Chionodoxa Luciliae, *home-grown roots*, per 100, 12s. 6d.; per dozen, 2s.

821 Chionodoxa sardensis, introduced by us in 1883. A First-Class Certificate was awarded to our plants, 1885, by the R. H. S., also by the Royal Botanic Society. J. G. in *The Garden* of 14th March, 1885, writes:— "Chionodoxa sardensis is a gem among spring bulbs—one of the rare really blue flowers. Compared with *C. Luciliae* . . . it is much brighter and deeper in colour, and a good sized patch is strikingly brilliant, the petals are coloured nearly to the centre. . . . Must become a great favourite." *Collected bulbs*. Amongst these, as in *C. Luciliae*, there will be found a percentage of a fine variety of *Scilla bifolia*, the two grow together, and, notwithstanding the care taken to separate them, there still remain some *Scillas*. Per 1000, 50s.; per 100, 6s. 6d.; per dozen, 1s.

822 Chionodoxa sardensis, *flowers rich true blue*, *home-grown bulbs*, per dozen, 5s. 6d.; each 6d.

THE SNOWFLAKES (LEUCOJUM), SPRING, SUMMER, AND AUTUMN.

Leucojum Vernum, the Spring Snowflake, one of our earliest flowers with blossoms resembling a large Snowdrop, tipped green, handsome in outline, and prized for bouquets. *L. Estivum* and *Pulchellum*, the Summer Snowflakes, flower in April and May, and remarkable for their elegant blossoms, which so closely resemble a Snowdrop as not to be distinguishable from it when used in bouquets. *L. Autumnalis* is a charming neat graceful white tipped pink Snowdrop-like flower, which blossoms in August and September. each—s. d.

EARLY-FLOWERING SCILLA.

The effect in early Spring can hardly be over-estimated of the intense rich blue of *Scilla sibirica*, and the beautiful ultramarine-blue of *Scilla bifolia*, contrasting with the snow-white of the Snowdrop, and the varied hues of the Crocus. As permanent edgings these two early-flowering Scillas are most valuable. Grown in pots or jardiniets, alone, or with other bulbs, they form a pleasing variety amongst indoor plants. In flower beds and masses, the blossoms are so abundantly produced as to carpet the ground. *Bifolia* is the first in bloom, and is closely followed by *Sibirica*, which in turn is succeeded by *Amoena*, thus forming in the succession of Spring flowers a connecting link with the Wood Hyacinth. See Figure in *The Garden*, 1878.

SCILLA (THE WOOD HYACINTH).

The Wood Hyacinth is the most decorative of May-flowering bulbs. Our native species, *Scilla nutans*, abounds in most parts of the country, and many suppose it to be the "Culver keys" referred to by Izaak Walton. The fine Spanish varieties (*S. campanulata*) of the Wood Hyacinth which we offer have larger flowers, are stronger growers, and handsomer than our native plants. *Campanulata*, *Emperor*, and *grandiflora*, when on good soil, are as effective as Dutch Hyacinths. They are very effective in flower and shrubbery borders, and most valuable for wild gardens, woodland walks, and to naturalize. The white varieties are greatly in demand to cut for table bouquets and vases. per 100. per doz. per 100. per doz.

PUSCHKINIA.

This beautiful variety of Puschkinia is a first-class hardy April flowering bulb, and should be represented in every garden. A coloured plate of it appeared in *The Garden*, 1878 and 1881.

853 Puschkinia libanotica compacta, white, deeply shaded and striped blue	per doz., 5s. 6d.; each o 6
---	-----------------------------

MUSCARI.

M. botryoides, the *Grape Hyacinth*, has a neat dwarf compact growth, with flower spikes of dark blue, clear pearl-blue, and pure white. It is an admirable plant for edgings to permanent beds, and beautiful under glass, 6 bulbs in a pot. M. racemosum, the *Starch Hyacinth*, is in bloom with M. botryoides, but differs in having a larger flower spike and the foliage being recumbent. M. moschatum, the *Musk Hyacinth*, has ineffective flowers, but delightfully fragrant, and is valued for pot-culture. M. plumosum monstrosum, the plume-like appearance of its handsome flowers has secured to it the name *Feathered Hyacinth*; it is the last in this section to flower, and deserves a place in every flower border. The Muscari, like the Wood Hyacinth, is a fine plant for naturalization, continues long in bloom, and is not particular as to soil or situation.

LILY OF THE VALLEY. For forcing, and making plantations out of doors.

The clumps of Lily of the Valley quoted have been specially prepared, and cannot fail to give abundance of flowers. In potting, the top of the crowns should be one inch below the rim of the pot; *tight potting* is of great importance, and care should be taken, in the first watering, that the moisture penetrates to the centre of the clump. Prepared crowns are now extensively used by the growers for Covent Garden Market, who put 20 to 30 in a 5-inch pot. The Berlin crowns are best for very early work; the Devonshire crowns force best after Christmas. The prepared clumps we think will be found by private growers preferable to crowns. The supply of first class clumps being limited, orders should be booked early, *for dispatch in November*.

CULTURE.—A moist atmosphere and abundance of water is indispensable to success in forcing Lily of the Valley; therefore, to encourage simultaneously the development of flower and foliage, most growers place the pots in a shady damp part of the house, or invert a flowerpot over the crowns, till the flower and the foliage have made some progress, then they are removed to a less shady situation. If they are grown in a dry atmosphere, or get an insufficient supply of moisture, the crowns, technically speaking, "go blind."

DIELYTRA (*Lyre Flower*). For forcing and planting out.

The most elegant of all forced plants for conservatory and room decoration, also to cut for furnishing vases. The graceful pendant branches are loaded with beautiful red heart-shaped flowers, and furnished with the most delicate rich green foliage. In shrubberies or herbaceous borders, few plants in summer are so attractive as the Lyre Flower.

SPIRÆA (*The Meadow Sweet of Japan*). For forcing and planting out.

The large graceful feathery pure white fragrant flowers of *Spiraea japonica* surpass all else in this way to cut for furnishing vases, and the plant is one of the most decorative for the conservatory and room. In forcing, a moist atmosphere and abundance of water is necessary. *Spiraea palmata* has bright red feathery flower spikes, which are strikingly beautiful. *Spiraea japonica* fol. *aureo-reticulatis* is a unique plant, forces the same as *S. japonica*, and is remarkable for the fine yellow veining or reticulation of the leaves. In sheltered moist borders out of doors, these plants are very decorative.

FUNKIA, OR THE HARDY PLANTAIN LILY.

These handsome ornamental-foliaged hardy herbaceous plants develope their leaves early in Spring, and in Summer and Autumn throw up a profusion of fine Lily-like flower spikes. The leaves range in size from the miniature to the gigantic, and from pale green to a deep glaucous green. All are grand plants for edgings, and the large-leaved sorts adapted especially to naturalize in wild gardens; also to grow as distinctive objects in the grass of pleasure parks, etc., as exemplified by their extensive use in Hyde Park. For pot-culture under glass we especially recommend, for its neat snow-white flowers, *Ovata spathulata speciosa*, a small leaved plant, and for its large spike of snow-white flowers, *Subcordata grandiflora*, a handsome large-leaved plant; also those with variegated foliage, and all the large-leaved kinds. Out of doors in shady and somewhat moist situations the Plantain Lily is most decorative; there the foliage is developed to its full size.

IRIS.

The Iris is the "Orchid" of the flower garden; its blossoms are the most rich and varied in colour of hardy plants. It should be extensively planted in flower and shrubbery borders, and naturalized in wild gardens. As a cut-flower the Iris is invaluable, competing in richness and variety of colour with the choicest and the most beautiful Orchids. A judicious selection of Iris should include not only the rich colours and the aesthetic combinations of colours, but such varieties as will ensure a succession from Christmas to August, and this is achieved at an outlay not exceeding the cost of one specimen Orchid. *Iris Alata*, *Stylosa* and *Reticulata*, flower in winter, followed by the violet-scented *Persica*. Next in succession comes the beautiful *Iberica*, then *Pumila*, and the other early-flowering Dwarf Iris. Close after these follows the *Iris Barbata* group, with an almost endless variation in colour, from white and the richest golden-yellow, to rose, intense purple, pale blue, and beautiful bronzes. The Beardless section continues the succession in *Sibirica*, *Orientalis*, *Gramineata*, *Versicolor*, *Virginica*, etc.; and are succeeded in July by the clematis-like Japanese Iris *Kempferi*. The Spanish bulbous Iris flowers in June, and is followed by the English bulbous Iris; thus the succession, in conjunction with *I. Kempferi*, is carried to August, the close of the Iris season. We must not forget in the category the pretty *Peacock Iris*, the wonderful *Iris susiana*, with its large, dusky, curiously and beautifully reticulated flowers, nor the charming *Iris cristata*, a glorious plant on dry banks; these, with the handsome Beardless and sub-aquatic Iris, are links in an unbroken chain.

To cut for filling vases and for table bouquets, all the Iris are admirably adapted, and when necessary to forward the flowers to a distance, gather the buds just before expanding, and, like the Gladioli, they will open in water. The effect is greatly enhanced when the individual blossoms are arranged in wet sand or moss.

ENGLISH IRIS (THE LARGE BULBOUS IRIS OF SPAIN).

This magnificent Iris thrives best in a well-drained soil; when planted in heavy soil, surround the bulbs with sand. When convenient plant as soon after the beginning of September as possible, although we have planted as late as December, and even in January; but the earlier the planting is done the better. The varieties described are distinct, and as strikingly beautiful and varied in colour as the most sumptuous orchids of the hot-house.

We exhibit annually cut flowers of this grand Iris at the Meetings of the Royal Horticultural Society, &c.

s. S. is used to signify the Standards or erect petals, *F.* the Falls or drooping petals.

SPANISH IRIS (THE SMALL BULBOUS IRIS OF SPAIN).

The Spanish Iris are in flower a fortnight before the English, and differ considerably, the flowers being smaller, and the combination of colours quite different; the blendings of the colours are more curious, and in this respect may be compared with the more rare of the curiously coloured orchids. They require the same cultural treatment as the English Iris. See coloured plate in *'The Garden,' 1881.*

AD We exhibit annually cut flowers of the Spanish Iris at the Meetings of the Royal Horticultural Society.

BULBOUS IRIS, VARIOUS.

Under this heading all the Iris are hardy and beautiful. *Alata* flowers variously from September to Christmas. *Histro*, if the weather is open, flowers at Christmas; *Reticulata* follows soon after, and if grown under glass its delicately fragrant flowers may be enjoyed with the early forced bulbs in December. Out of doors *Reticulata* continues decorative from February till April, expanding its sweet-scented blossoms at a temperature too low even for the Narcissus to bloom. *Persica* flowers about the same time as *Reticulata*, the blossoms emitting a delicate violet perfume, and is equally prized in the conservatory and flower garden. *Pavonia* (the Peacock Iris) expands its delicately coloured flowers in May and June, and requires to be cultivated the same as the *Ixia*. *Caucasica* has primrose-coloured flowers, and its light green foliage is silver-margined. *Lusitanica* and *Juncea* are remarkable for their rich yellow flowers: *Lusitanica sordida* is a noble plant.

	each—s. d.
982 Alata, blue, shading to lilac, ½ ft. Figured in "The Garden," 1878	1 0
983 Caucasica, primrose-coloured flowers, with silver-margined foliage, ½ ft.	2 6

991 " Krelagei, red-purple, blotched golden-yellow, very fragrant, ¾ ft. ...per doz. 7s. 6d.	0 9
992 Tingitana, purple, spotted orange.....	" 2 6

THE FLAG, OR EVERGREEN IRIS.

The following sections of Iris have rhizomatous roots and flag leaves. The family has a wide range of habitat, being found more or less in almost every country, and at almost every altitude, from the dell to the mountain top, with considerable variations of colour and form, and with much diversity of growth, ranging from the miniature *I. erisata* of the North American uplands to the tall *Pseudo-Acorus* of the British marshes. The varieties commence blooming with our Spring flowers, and continue a floral display till the end of July. Some of the dwarf species make admirable edgings, and others are very effective on rockwork; the taller growing kinds are magnificent objects in flower and shrubbery borders, also for naturalization and to plant in woodland walks, and round the margins of lakes, ponds, etc., many of the family being marsh aquatics. The flowers vary in size from the miniature to the most sumptuous, and for decorative purposes compete with the most beautiful Orchids. For filling vases few cut-flowers will compare with the Iris. The individual blossoms placed on flat dishes in wet sand or moss look beautiful on the table. When Iris flowers have to travel some distance, cut them just before expanding.

IRIS KÆMPFERI (the Clematis-like-flowered Japanese Flag Iris).

The magnificence of these splendid new Japanese Iris surpasses any written description that we could give of them. The large flat flowers measure from 6 to 8 inches in diameter, with a breadth of petal 3 to 3½ inches; the prevailing colours being white, magenta, crimson, rose, lilac, lavender, French grey, purple, violet, and blue, each flower usually representing several shades, while close under the petaloid stigma is a brilliant yellow or orange blotch or feather more or less conspicuous, and almost always surrounded, except in the whites, by a halo of blue or violet. The young flower, as it unfolds, frequently exhibits a different hue to that represented after the lapse of a few hours; thus the newly expanded flower presents an intensity of colour, with a richness of bloom over the surface of the blossom, which is charming. Plate of Iris Kæmpferi, was figured in *The Garden*, 1876 and 1881.

CULTURE.—A naturally good adhesive, moist, loamy garden soil, laying well to the sun suits this plant. For example, on the moist Bagshot soil, in Mr. Stevens' garden the plant makes very strong growth, and flowers with remarkable freedom. When a soil has to be specially prepared, we recommend leaf soil, loam and peat in equal parts; but manure should not be given unless as a liquid. *We are of opinion that the Iris Kæmpferi is semi-aquatic in summer, but should be dry in winter.* Professor Foster's experience is to keep the soil round the plants in a wet quagmire state from early April to October. This season we have again followed this plan with success. A great many have flowered, and especially new importations from Japan, thirteen of which we offer and indicate by *.

NEW IRIS KÆMPFERI (CLEMATIS-LIKE IRIS OF JAPAN).

IRIS BARBATA, THE BEARDED IRIS, COMMONLY CALLED GERMAN OR FLAG IRIS.

do so It is also most valuable wherever a large quantity of cut flowers are required, from May to July, as plants when established, will, with good cultivation, increase in size annually till they attain large proportions, each plant yielding 50 to 100 spikes of bloom.

In the description *S.* is used to signify *Standards*, or the erect petals; *F.* *Falls*, or the drooping petals.

We have arranged the Iris Barbata in natural groups, to facilitate amateurs in making selections. Each group has a distinctive characteristic. Germanica flowers first, and is represented by the blue, purple, and white

King Street, Covent Garden, 1886.]

IRIS BARBATA—continued.

Flag Iris of our gardens; these flower at the same time, and are extremely decorative in May. Following in June comes *Aphylla*, with Standards having a frill-like appearance arising from the marginal coloured transverse lines on a white ground. *Amena* has the standards white. *Neglecta* has the standards purple, or approaching to purple. *Pallida* has the standards ranging from pale lavender to rose-lilac. *Squalens* embraces those with aesthetic-coloured standards; and *Variegata* has the standards yellow or tending to yellow.

BEARDLESS SPECIES OF FLAG IRIS.

The Iris offered in this section are perfectly hardy, and altogether distinct from the Bearded group. Most of them make grand aquatics especially *Aurea*, *Monneri*, *Ochroleuca*, *Goldenstadtii*, and the varieties of *Pseudocorus*, and *Spuria*, which in water are not only majestic in growth, but have flowers surpassingly beautiful. The varieties of *Sibirica*, including *Orientalis*, are graceful in water. All the other Iris in this group, with the exception of *Cristata*, *Iberica*, *Ruthenica*, *Stylosa*, *Susiana*, *Tectorum*, and *Tuberosa*, may be grown as marsh aquatics. *Cristata* is charming on dry banks and rock-work in sunny sheltered places; *Iberica* and *Susiana* require special treatment. Dr. Foster grows these beautiful Iris successfully, they are planted in the soil and covered with a frame from the middle of June to the middle of October, thus securing to them a period of rest. From October till in flower the lights are removed and the plants exposed to all weathers. From a very small space, Dr. Foster cuts multitudes of flowers of the finest quality from these and other kindred species by this simple treatment. *Fætidissima* is valuable for damp shady situations, and its seed vessels are much prized in winter; *Tectorum* is found on the thatched roofs of Chinese houses, where it gets a good roasting in summer.

IXIAS, MORPHIXIAS, SPARAXIS, TRITONIAS, AND BABIANAS.

CULTURE IN-DOORS.—From September to December plant in a four or five-inch pot five or six bulbs, using a compost of turf loam, leaf soil, and silver sand. Make the soil firm about the bulbs, then plunge the pots in ashes in a cold pit or frame, and withhold water till the plants appear, then at first give sparingly. Except during wet or frosty weather, the lights should be left off. Early in February, the plants having made sufficient growth, remove them to the greenhouse, and carefully attend to the watering.

CULTURE OUT-DOORS.—Plant from October to January, at a depth of three to four inches, and two to three inches apart, in a prepared light loamy soil, thoroughly drained, the bed raised six inches above the general level, with a due south aspect. Should the earlier plantings make foliage in autumn, protection must be given during severe frost, and this is best done by hooping the beds over, and, when necessary, covering with mats; or Tiffany may be used, and can remain on till the danger from severe frost has passed. The plantings made in December and January need no protection beyond a little fern, which gradually remove in spring as the plants spear through it; as these late plantings will flower later in summer than the earlier ones, select a situation for them where the sun's rays will be somewhat broken, and the blooming period will thereby be prolonged.

IXIAS.

The Ixia is a slender graceful growing plant, with long loose spikes of bloom. The colours are rich, varied, and beautiful, the centre always differing in colour from the other parts of the flower, so that the blossoms expanding in the sun's rays, present a picture of gorgeous beauty.

The descriptions refer to the flowers when open; when closed, most of the yellows and the whites have the outside of the petals red or purple; thus, the more brilliant display is in the expanded flowers.

MORPHIXIAS.

These have the same graceful habit as the Ixia, and are very floriferous; they come into bloom later than the Ixias, and continue in flower frequently till August.

SPARAXIS.

It would be difficult to conceive colours more diversified and gorgeous than is represented by the Sparaxis, and one can well appreciate Mr. Saunders' observation, "that he has seen the knee of an enthusiast bent and gymnastics performed over a bed of these, without feeling at liberty to condemn the performer." The fine compact dwarf growth of the Sparaxis, and its rich beautiful colours, mark its suitability for pot-culture.

TRITONIAS.

The habit and growth of these resemble the Sparaxis, but the prevailing colours differ, and flowering later, they form a most important succession. The colours range from buff to rose and the richest glowing orange, the flowers always having a beautiful transparency. At Cliveden, the late Mr. Fleming was in the habit of growing hundreds of pots of Crocata for furnishing jardines.

BABIANAS.

The flowers of the Babiana range in colour from blue to the richest crimson-magenta, and set off by a dark green hirsute foliage, they form a striking contrast both in flower and foliage to the Sparaxis and Tritonia. The Babiana has the same fine dwarf compact growth, and is a good companion plant to Sparaxis and Tritonia, in pots or out of doors.

THE RANUNCULUS.

CULTURE.—Plant the Turban Ranunculus from October to March, and the Persian varieties from January to April. When the soil works kindly, and the day is dry, draw drills two inches deep, and five or six inches apart; at the bottom of the drill sprinkle a little sand, press the tubers firmly into the soil, claws downwards, and cover with sand, then with soil, keeping the crown of the tuber two inches under the surface. During severe weather, cover the early plantings with dry litter, leaves, or old tan, and this remove before the foliage in Spring gets injured. In April and May, during dry weather, water the beds freely, if necessary two or three times a week; and when the flower-buds appear, water if required daily, and continue doing so while the plants are blooming, taking every care not to wet the foliage if possible.

DOUBLE PERSIAN RANUNCULUS FOR BEDS, RIBBONS, AND MASSES.

The named varieties have been selected on account of their large flowers and fine colours.

TURCO-PERSIAN NEW LARGE-FLOWERING RANUNCULUS.

This new race of Ranunculus is remarkable for a vigorous growth, and is profusely floriferous; the plants attain a height of about 18 inches, and produce from 10 to 15 blossoms. Where cut flowers are in demand, these new Ranunculus are most valuable, as flowers may be gathered from the same bed several times a week, during the flowering period, without impairing the display.

THE ANEMONE, OR WINDFLOWER.

Anemone flowers embrace scarlets, roses, blues, and purples of the most dazzling hues, also the purest whites, and endless variations in stripes. The habit of the plant is excellent, and the foliage elegant. For beds, edgings, and masses, where Spring flowers are grown it is matchless, and may be had in bloom, weather permitting, from November to July, according to situation, locality, and time of planting.

CULTURE.—Any good soil, moderately well drained, suits the Anemone. In its native habitat it grows mostly in vineyards and oliveyards, where it is partially protected from the sun's rays and parching winds, the most potent enemies of Spring flowers. Plant in succession from August to May, the roots four to six inches apart, and at a depth of two to three inches; this should be done when the ground is in good working condition and on a dry day. *The plantings for Summer and Autumn-flowering, must be in a situation where the ground is moist, and in shade from after 10 or 11 a.m.*

NEW DOUBLE POPPY ANEMONES, FOR BEDS AND MASSES.

The flowers of the Double Poppy Anemone resemble a semi-double Hollyhock, and are extremely handsome. When planted from September to December, they flower in succession during the early Spring months, and those planted from January to April flower in succession from April to July.

ANEMONE FULGENS (SCARLET WINDFLOWER)

This is the most brilliant and graceful of all Winter and Spring-flowering Anemones. The rich dazzling scarlet flowers, and light elegant growth, render it the most attractive scarlet flower of Spring. It is valuable for table bouquets or vases, as it lasts a long time in water. If the roots are planted early, flowers may be gathered from Christmas, and, by successional plantings, from August to May, a continued display is maintained till late in autumn. *The plantings made for summer and autumn-flowering must be in a situation where in summer the ground is moist, and in shade, from after 10 or 11 a.m.* (Figured in *The Garden*, 1877.) per 100 per doz.

SUNDRY ANEMONES.

Anemone apennina, the blue Mountain Windflower, forms a dense cushion of rich blue, and is one of the loveliest dwarf Spring flowers, and, when associated with *Triteleia conspicua*, the delicate porcelain flowers of the one blend most charmingly with the rich bright blue of the other. *A. blanda* resembles *A. apennina*, but flowers a month earlier. The varieties of *Anemone nemorosa* are most charming, and no flower border should be without its clumps of these, as they literally carpet the ground with their neat flowers. *A. nemorosa* Robinsoniana is a remarkable plant, and *Anemone nemorosa* bracteata may be called "the Jack in the Green" of Anemones, the white petals resting on a profusion of green bracts. As pot plants these Anemones are very charming. *A. japonica*, white, rose and red, are the most decorative of Autumn-flowering herbaceous plants.

CYCLAMEN

From November to March, *Cyclamen persicum* is brought in large quantities to Covent Garden Market, many of the specimens having upwards of two hundred flowers, and realizing high prices. This *Cyclamen* is an indispensable plant for indoor decoration, and few flowers are more highly prized for button-hole bouquets, ladies' dresses, and finger-glasses. It may be cultivated in a cool greenhouse, or cold frame, with a little winter protection; but it is in a temperature of 45° to 60° the Covent Garden growers produce their fine plants, and these are mostly from seed sown in Autumn, and not allowed to go to rest till they have flowered the following winter.

All the hardy Cyclamen are European; they require perfect drainage, and shelter from the cutting winds
King Street, Covent Garden. 1886.]

CYCLAMEN—continued.

of March and April, and the hot rays of the Summer sun; at the bottom of old walls and on rockwork, they are very beautiful; or nestling in the grass, near the roots and under the shelter of old trees, the effect is most charming. *C. Europaeum* (roots from the open ground, 25/- per 100) commences flowering in July, the blossoms are very fragrant; and is followed in Autumn by the varieties of *C. Hederæfolium*, which have beautiful Anoectochilus-like variegated leaves, these again are succeeded by the winter flowering varieties—Atkinsi, Ibericum, and Coum, which flower from December to March; Repandum and Vernum close the Cyclamen season in April, and as these two are Italian species, they should be planted in sheltered nooks on rockwork, and protected with leaves till March. We have all the varieties of hardy Cyclamen naturalized under large elm trees, and they may be seen flowering from July to April.

The Cyclamen *hederæfolium* varieties, with their beautiful Anoectochilus-like variegated leaves, are unusually decorative throughout Autumn and Spring, and often have we felt surprised that not more advantage has been taken of these for Winter beds, intermingling with them for succession *Scilla bifolia*, *Scilla sibirica*, *Chionodoxa luciliae*, *Leucocym vernum*, *Narcissus nanus*, Snowdrops, &c.

The hardy Cyclamen are kept in pots ready for despatch at all seasons, C. europæum, at 25s. per 100, are lifted from the bed out of doors as wanted.

1486 Seed from Large Flowered Prize Varieties of *C. persicum*, 2s. 6d. and 3s. 6d. per packet. Seedling plants, when properly cultivated, make fine specimens in 12 to 15 months.

1487 *Cyclamen persicum*, large-flowered varieties, for Greenhouse decoration, per doz., 15s., 21s., 25s., and 30s.; according to size, each, 1s. 6d., 2s., 2s. 6d., and 3s. 6d. Larger specimens, each, 5s. 6d., 7s. 6d., 10s. 6d., 12s. 6d., 15s., and 21s. Plants in flower can be supplied from December at market prices.

HYACINTHUS CANDICANS.

THE GREAT SNOW-WHITE SUMMER-FLOWERING HYACINTH.

1510 *Hyacinthus Candicans* is perhaps the most ornamental of summer-flowering hardy bulbs; it attains a height of 3 to 6 feet, according to soil and situation, and is surmounted with 20 to 50 graceful pendant pure white bell-shaped flowers. It is equally decorative for the flower border and conservatory. Figured in *The Garden*, 1831. Flowering bulbs, per 100, 15/-, 21/-, and 30/-; per doz., 2/6, 3/6, & 4/6; each, 4d. & 0 6

EARLY-FLOWERING GLADIOLI (Summer-flowering).

These beautiful early-flowering Gladioli are greatly prized as cut flowers in July, and on this account, and for the fine effect they produce in the flower garden, should be largely planted. G. Colvilli, "The Bride," is exceptionally valuable, and extensively grown in pots to cut during April, May, and June for Covent Garden Market. All these early Gladiolis may be grown in pots for indoor decoration, or to cut for filling vases, etc.

CULTURE.—Trench the ground, working in plenty of rotten manure in the underspit; plant the varieties of Colvilli, Cardinalis, and Byzantinus from the beginning of October, and the others from November till March, at a depth of six inches. If the summer is dry and the weather hot, a good soaking of water or liquid manure twice a week greatly benefits the growing plants.

CULTURE FOR CONSERVATORY DECORATION.—Plant three to five, according to the size of root, in a five or six-inch pot, and plunge in ashes in a cold frame or pit, and withhold water till the bulbs have started into growth; or, the pots may be buried in ashes out of doors, as recommended for the Hyacinth, and there allowed to remain undisturbed till ready to remove indoors. It is customary with some to plant several bulbs close together in the open border, and, when the flower begins to colour, lift without breaking the ball, pot, and place indoors. So treated, the flowers expand as if the bulbs had not been disturbed.

FRENCH VARIETIES OF GLADIOLUS GANDAVENSIS.

(Autumn-flowering Gladioli.) Roots Ready in December.

NOTE The roots offered are from the most experienced cultivators in France, and are all selected to give large flower spikes.

CULTURE.—Trench the ground as deep as the soil will admit, intermingling as the work proceeds abundance of rotten manure, and plant the roots at a depth of 6 inches.

TIME OF PLANTING.—From the middle of April to the beginning of June we consider the best time to plant; when one planting only is made, we should recommend it being done early in May, but if successive plantings are made, commence middle of April, and continue fortnightly till the middle of June.

PLANTING TO ADVANTAGE.—Groups of three to a dozen roots, planted in the flower borders in distinct, or diversified colours, produce an exceedingly fine effect. The roots should be six inches from each other, and when the plants are sufficiently advanced place a stake in the centre of the group, and fasten the plants to it.

GLADIOLI ROOTS, VARIETIES OF GANDAVENSIS.—Ready to send out in January.

AMARYLLIS.

Under this heading there are plants arranged very different in character, and requiring separate treatment.

THE GUERNSEY AND BELLADONNA LILIES.

The flowers of the Guernsey Lily are brilliant scarlet, and when seen with the sun's rays on them have the appearance of being spangled with gold-dust. The flowers of the Belladonna Lily are large, pure white, flushed rose-purple, and produced in large umbels of many blossoms.

NOTE The Guernsey and Belladonna Lilies are received by us in bud *early in September*. The supply being always uncertain, orders for them should be given as soon as possible after the 1st, and not later than the 15th September. When executing orders for the Guernsey and Belladonna Lilies, we carefully examine the flower-buds, and send only such plants as give promise of good flowers. Delay in transit, neglecting to plant immediately, or, perhaps, an undeveloped defect in the flower-bud, often leads to partial failure, and as we cannot hold ourselves responsible for such contingencies, purchasers are recommended to buy an extra quantity, as the roots are so very inexpensive.

CULTURE.—Immediately the Guernsey and Belladonna Lilies are received, pot them in light soil, prepared cocoa-fibre or moss, and give water liberally. Bulbs of Guernsey Lilies, purchased after the flowering season, should be potted and grown under glass. Bulbs of Belladonna Lilies may be planted under a south wall at a depth of one foot, and when established will flower annually.

	per doz., 7s. 6d. ; each 0 9	s. d.
1560 Guernsey Lily (<i>Nerine sarniensis</i>)		

HARDY AMARYLLIS.

The Belladonnas in Autumn produce large umbels of beautiful rich, delicately coloured flowers, and in pots are very effective for conservatory decoration. Grown out of doors, plant at a depth of one foot, under a south wall, or immediately in front of a greenhouse; there, undisturbed, they will annually produce gorgeous umbels of flowers. The varieties Longifolia (*Crinum*) produce large umbels of beautiful funnel-shaped sweet-scented blossoms, and being perfectly hardy, are admirable to plant in mixed flower borders. Candida (*Zephyranthes candida*) "The Flower of the West Wind," is a neat edging plant, and decorative in groups; in autumn it throws up a profusion of white Crocus-like flowers. Luca (*Sternbergia lutea*), "The Lily of the Field," is also a good hardy bulb, for edgings, and groups, its rich golden-yellow Crocus-like flowers, expanding in Autumn from the midst of a bright fresh green foliage.

VALLOTA PURPUREA AND THE JACOBEA LILY.

Vallota purpurea, known also as Scarborough Lily, is most valuable as an Autumn-flowering plant, and as a cut flower for filling vases. Amaryllis formosissima, the Jacobea Lily, is a quaintly-shaped beautiful flower, and forces well, it should be potted in succession for Spring decoration. In May the dry bulbs can be bedded out or planted in the flower borders for Summer-flowering. Vallota purpurea we recommend to be planted out of doors in May, and when in bud potted up for conservatory decoration.

CHOICE GREENHOUSE AMARYLLIS.

These are grand plants in the conservatory, and to cut for table bouquets and vases. With management, these magnificent Amaryllis may be had in bloom for many months. The unnamed seedlings offered we specially recommend; they are from the most advanced collection in Europe, and cannot fail to please, both as regards variety of colour and beauty of flower. The bulbs are large, full grown, ready to flower.

CULTURE.—Immediately after potting, place in a moist temperature, and, if convenient, plunge the pot to the rim in a gentle, steady, moist bottom heat; thus treated, a vigorous leaf growth is produced, and a large umbel of flowers secured.

THE LILUM.

The Lily is matchless amongst hardy plants for variety of colour, chasteness, and beauty of form. It commences flowering in May, and maintains a continuous unbroken succession of bloom from species of different countries, till the frosts of autumn destroy the last unexpanded flower buds; thus it is unequalled for its successive display, and is an important plant to associate in beds with Rhododendrons, Paeonias, Double Pyrethrums, and Herbaceous plants.

CULTURE OUT OF DOORS.—In its native habitat the Lily is usually found growing amongst brushwood or long grass, in soils of varied texture, but always sweet and well drained; so that, in choosing a situation for planting, perfect drainage, natural or artificial, should be the first consideration. The borders of Rhododendron and Azalea beds are generally suitable for Lily culture, as the necessary compost for the particular species can easily be given, and the shelter from the surrounding branches is beneficial in protecting the plants in spring, and affording partial shelter from the sun's rays in summer; amongst dwarf shrubs, or herbaceous plants, and in the proximity of trees, the Lily makes the most satisfactory growth, if care is taken that there is always sufficient exposure so that the plants do not make a feeble growth. In the preparation of ground for Lilies, loosen the soil to a depth of several feet, and add fresh loam, coarse sand, good peat, or sweet decomposed leaf soil, care being taken that the soils are free as possible from insect life, and the compost sufficiently friable not to cling to the bulb. Plant the bulbs 6 inches deep, and if all things are equal they may remain undisturbed for many years. The bog or swamp-loving Lilies, Superbum, Canadense, and the varieties of Pardalinum require a moist peaty soil. Rockwork and artificial mounds, such as may be seen in the Edinburgh Botanic Gardens, are admirable for lilies, there being sufficient choice of aspects, soil, and drainage—thus the majestic bog-loving lilies would occupy the base with marsh plants, and the other species such positions as are best suited to them.

at Tbose with a * do best in loam and leaf soil; † sand and leaf soil, in warm situations; ‡ peat with a little loam, in damp situations.

CULTURE IN-DOORS.—When grown in pots the Lily should have a compost of fibry loam and good peat, with plenty of sand, or sweet leaf soil and loam with sand, the bulb potted firmly, and the top covered at least two inches; this done, *plunge the pots in ashes out of doors on the north side of a wall or hedge*, and there let the Lilies remain till they speak through the ashes, or, still better, till the flower buds are formed; at this stage remove to the conservatory, corridor, or sitting-room. *Lilies in pots, when removed from the ashes, should have clear liquid manure twice a week. The drainage of the pots must be good, and no stagnant moisture tolerated in the plunging ground.* Superbum, Canadense, and the varieties of Pardalinum, prefer moist sandy peat.

1579 **at** **LILUM AURATUM** (*The White Gold-Banded Lily of Japan*). Strong Devonshire-grown

1668 *Wallichianum. The flowers of this magnificent Lily are 9 to 12 inches long, of great substance, and deliciously fragrant. Figured in "The Garden," 1876		7 6
1669 *Washingtonianum, white, shading to lilac, handsome, 3 ft. Figured in "The Garden," 1881, 2/6 &		3 6

HELLEBORUS OR CHRISTMAS AND LENTEN ROSES.

The Christmas and Lenten Roses are the representatives of Winter flowers. In the family there is great variety, both in the flower and foliage. On rockwork and in flower-borders established plants are highly decorative, covered as they are with blossoms at a time when outdoor flowers are scarce.

From the *H. orientalis* section has originated some beautiful sorts, and the new varieties of this *section of Lenten Roses* which we catalogue are important additions, and will be found highly decorative in the flower garden, or cultivated in pots for greenhouse decoration. The nine varieties of *H. orientalis* figured in the coloured plate of *The Garden*, 19th July, 1879, fairly represent the family at that time. A supply of these coloured plates have been secured, so that any of our customers who have not seen the plate, and intend purchasing these plants, can have it forwarded free on application; otherwise the plates can be had, 1s. each.

Mr. Moore, Curator of the Chelsea Botanic Gardens, has been studying the Helleborus family in conjunction with Mr. Barr during the past few seasons, and has issued with *The Florist and Pomologist* a coloured plate of new varieties, which we trust will be followed shortly by a popular monograph. In *The Gardeners' Chronicle* of 1879, Mr. Moore gave descriptions of thirty-five species and varieties of Hellebores then in flower at our grounds, and in April, 1881, contributed another paper on New Helleborus, and in *The Gardeners' Chronicle*, 1877, there is a comprehensive monograph by Mr. Baker, of Kew. In *The Garden*, 1878, there is a monograph, accompanied by a plate of *Helleborus maximus*. It will, therefore, be seen that this family has received considerable attention from the Horticultural press.

The genus Helleborus has six representative species or heads of families, viz.:—*H. vesicarius*, of Mount Cassius, near Antioch, a plant not yet introduced into cultivation; *H. fétidus*, *H. lividus*, *H. niger*, *H. orientalis*, and *H. Viridis*, the three last named are illustrated in the coloured plate which accompanied *The Garden* of 19th July, 1879. Mr. Baker in his monograph recognizes as geographical varieties of the type *Viridis*: *Dumetorum*, *Laxus*, *Bocconia*, *Cyclophyllus*, *Graverolens*, *Intermedius*, *Cupreus*, *Purpurascens*, and to these we add a charming dove-purple coloured species, named by Mr. Archer-Hinde *Torquatus*. The *Orientalis* group has the leaves coriaceous and persistent, with a polished green surface, and the segments generally conspicuously toothed; the flowers are usually large, the sepals frequently imbricated and assuming a bell shaped form, surmounted on stems two or three times forked, thus forming a showy branched panicle of flowers, which range in colour from the richest crimson to white. The geographical varieties of the type *Orientalis* are *Antiquorum*, *Guttatus*, *Olympicus*, *Pallidus*, *Caucasicus*, *Odorus*, *Atrorubens*, *Colchicus*, and *Abchasicus*.

 The Christmas and Lenten Roses make good pot plants, and are well worth the attention of gardeners to grow into large specimens, for conservatory decoration.

THE CHRISTMAS ROSE (HELLEBORUS NIGER).

In the gardening papers there has been a good deal of discussion relating to the varieties of the Christmas Rose, and more especially "*St. Bridgid's*" and *Mr. Brockbank's Christmas Roses*, see *Gardeners' Chronicle*, January 19th, 1884, &c., also *The Garden*. Specimen plants of each we received direct from headquarters, and have no hesitation in saying they are not the same.

The Christmas Rose is in flower during December and January. To have the blossoms pure white for Christmas decoration, the plants should be protected at the time of flowering. A hand-light, resting on bricks, will be sufficient for a large specimen; but when a great number of flowers are required, a temporary pit should be made, the natural soil, if unsuitable, removed, and a mixture of loam and rotten dung, or loam, leaf soil and dung substituted. When the flower buds appear, protect with lights, and give plenty of air, but dispense with the lights as soon as possible after the flowering season. For naturalization and wild gardens, the Christmas Rose is a grand plant.

1677 *Niger* (*the Christmas Rose*) per doz. (according to the size of the plants), 5/6, 7/6, 10/6, 15/, and 21/.
each, 6d., 9d., 1/-, 1/6, & 2/-

1678	" <i>maximus</i> (<i>the Great Christmas Rose</i>), figured in "The Garden," 1878, under the name of <i>Helleborus altifolius</i> . This is a grand species, and is as remarkable for its large dark green leaves as for its very large rose-tinted flowers, which are pure white if opened under the protection of a hand-light or frame after the flower buds appear.....	each 1/6, 2/6 & 3 6
1679	" <i>major</i> (<i>the large Christmas Rose</i>), this is somewhat larger in flower than the type, each 1/6, 1/6 & 2/6	2/6
1680	" <i>minor</i> (<i>the small Christmas Rose</i>), a very distinct and very fine varietyeach 1/-, 1/6 & 2/6	2/6

THE LENTEN ROSE (HELEBORUS VIRIDIS).

This section is distinguished by the leaves disappearing in winter. *H. atrorubens*, of Waldstein and Kitabell, belongs to this section; it has a small green, purple margined flower, and a large much divided leaf. The *H. atrorubens* of Bot. Mag. is *H. abasicus*, of Regel's *Gartenflora*.

1720 Bocconi, large bright green flowers, elder-scented	1 6
1721 Dumitorum, small green flowers	2 6
1722 Graveolens, tinged brown-purple, inside green	1 6
1723 Intermedius, outside dove-purple, inside green	2 6
1724 Luridus, tinged brown-purple, inside green, foliage elegantly divided	2 6
1725 Purpurascens, green, tinged purple	1 0
1726 Torquatus, a very fine dwarf species, with beautiful dove-coloured flowers	2 6
1727 Viridis (of the Thuringerwood), large whitish green flowers	1 0

ORNAMENTAL-FOLIAGED HELLEBORES.

1728 Fottidus, flowers green, foliage dark green and very ornamental	1 6
1729 Lividus (syns. argutifolius, trifolius, triphyllus, corsicus, and illicifolius), flowers bright green, foliage light rich green, very ornamental	2 6

HERBACEOUS HARDY JUNE-FLOWERING CHINESE DOUBLE PÆONIAS.

(Varieties of *Albiflora*.)

These noble plants compete favourably in general effect with the finest hybrid Rhododendrons, whether it be in variety of tint, diversity of colour, profusion or duration of bloom. With these qualities, combined to a handsome, massive foliage, accommodating habit, and easy culture, you have a plant to occupy the place of, or to associate with, the Rhododendron. These Pæonias succeed in any ordinary garden soil, and are equally adapted to intermingle with shrubs, or to take their place amongst herbaceous plants in flower borders and wild gardens.

The first flowers are large, massive, and most perfect in outline, the secondary flowers are smaller, very neat, and beautiful; indeed, it would be difficult to conceive a more decorative and generally useful plant, rivalling in effect the Rhododendron, and possessing the symmetry and fragrance of the Rose. As a cent flower it is of great value, travels admirably, and supplies the utmost variety of shade and colour, from snow-white to the most intense crimson. See coloured plates in *The Garden*, 1880 and 1881.

CULTURE.—Trench the ground before planting, as deeply as possible, adding abundance of *rotten manure*, and then mulch the surface with manure. In Summer, if convenient, give a plentiful supply of liquid manure twice a week to encourage a rapid development, as the plant is decorative in proportion to its size. The Pæony may be planted in any position, but, considering that the flower buds are formed early in Spring, it is preferable to grow the plants where the sun's rays do not fall upon them in Spring earlier than 11 or 12 o'clock.

Ad. The editor of *The Garden* (Mr. William Robinson) suggests beds of Pæonias, associated with Lilies and Gladioli, and edged with Plantain Lilies; the best and most massive of the plain-leaved Plantain Lilies are *Subcordata grandiflora* for light green, *Sieboldii* for a blue-green, and *Ovata* for a dark green foliage; and of the variegated-leaved kinds, *Viridis marginata*, silver-edged, and *Glaucescens variegata*, golden-variegated foliage.

 1755 *Charles Binder*, rich magenta-rose, 1s. 6d.
 1756 *Clariese*, deep rose, fragrant, 1s. 6d.
 1757 *Comte de Cussi*, rose, fragrant, 1s. 6d.
 1758 *Comte de Parie*, rose, centre rose-pink
 1759 *Coralle Mathieu*
 1760 *Count Münster*, rich purple-crimson, rose-scented
 1761 *Cythera*, white
 1762 *Daurica plena*, purple
 1763 *Decaisse*, deep rose, fragrant, 1s. 6d.
 1764 *Decandolle*, fine rose, shading to pink, fragrant
 1765 *Delache*, deep red, 1s.
 1766 *Doyen d'Enghien*, rose, 1s.
 1767 *Dr. Brittonnau*, satin-rose, centre white
 1768 *Dubois Duval*, rose, centre tinged salmon, rose-
 1769 *Dr. Callot*, rose-salmon, 1s. 6d. [scented]
 1770 *Duc de Cazes*, rose to purple, fragrant, 1s. 6d.
 1771 *Duchesse de Modena*, rose, centre blush, 1s. 6d.
 1772 *Duchesse d'Orléans*
 1773 *Eclatante*, rich purple, 1s.
 1774 *Edulis fragrane*, deep rich rose, 1s. 6d.
 1775 .. *superba*, carmine-rose
 1776 *Etendard du Grand Homme*, brilliant rose, very
 large, rose-scented, 3s. 6d.
 1777 *Eugenie Verdier*, rose, centre white, 1s. 6d.
 1778 *Faust*, blush-white, fragrant
 1779 *Festiva maxima*, pure white, fragrant
 1780 *Formoœa*, blush, centre primrose, 1s.
 1781 *Fragrans*, full rose, rose-scented, 1s. 6d.
 1782 *François Ortigat*, rich purple, rose-scented, 1s.
 1783 *Fulgida*, deep rose, 1s. 6d.
 1784 *General Bedeau*, rose, centre sulphur, very frag-
 rant, 1s. 6d.
 1785 *Globoea*, deep pink, centre florets primrose, 1s. 6d.
 1786 *Grandiflora carnea*, 1s. 6d.
 1787 .. *nivea*, white, tinged rose, 1s. 6d.
 1788 *Humei*, scarlet-crimson, very dwarf, 1s. 6d.
 1789 *Humile*, 1s.
 1790 *Incomparabilis*, rose, shaded purple, fragrant, 1s.
 1791 *Insigne*, rose-carmine, rose-scented, 1s. 6d.
 1792 *Isabelle Karlitzky*, glowing purple-rose, rose-
 scented, 1s. 6d.
 1793 *Ildore Leroy*, crimson-purple
 1794 *Joseph Chamberlain*, rich purple-crimson, 3/6
 1795 *Josephine Parmentier*, rose, tinged purple, rose-
 scented, 1s. 6d.
 1796 *Jupiter*, fine rose, fragrant
 1797 *La Sublime*, rose-pink, rose-scented, 1s.
 1798 *L'Elegante*
 1799 *L'Espérance*, deep rose
 1800 *Leontie*, blush-white, fragrant
 1801 *Lord Salisbury*, rich crimson, very large, frag-
 rant, 3s. 6d.
 1802 *Louis Van Houtte*, purple-crimson, 1s. 6d.
 1803 *Madame Benard*, bright rose
 1804 .. *Bouchalet Aliné*, rich purple-crimson,
 fragrant
 1805 .. *Callot*, white tinged rose, rose-scented,
 1s. 6d.
 1806 .. *Chaumy*, rose shading to pink, fragrant
 1807 .. *Furtado*, magenta, centre florets tinted
 salmon-rose, rose-scented, 1s.
 1808 .. *Guerrin*, rose-carmine
- 1809 *Madame Lebon*, rich purple-rose, rose-scented,
 1s. 6d.
 1810 .. *Leman*, blush, passing off white
 1811 .. *Muynard*
 1812 .. *Raquet*, deep rose
 1813 .. *Schmidt*, purple-crimson, showing
 golden anthers, fragrant
 1814 .. *Varaquiz*
 1815 .. *Vilmorin*, blush, centre white, 1s. 6d.
 1816 *Madonna*, blush, centre white, 1s. 6d.
 1817 *Marquin*, rose, centre tinged primrose, fragrant,
 1s. 6d.
 1818 *Modeste Guerrin*, rose-magenta, rose-scented, 1/6
 1819 *Monsieur Galland*, blush
 1820 .. *Roueillon*, white, tinged rose, 1s. 6d.
 1821 *Neome*, full rose, rose-scented
 1822 *Ne plus ultra*, rich rose, 1s.
 1823 *Nobilissima*, full deep rose
 1824 *Pio IX.*, light crimson
 1825 *Pomponia*, carmine-rose, centre tinged salmon,
 rose-scented
 1826 *Pottsii*, rich crimson, showing the golden anthers,
 1s. 6d.
 1827 .. *carnea*, carmine-flesh, showing golden
 anthers, 1s. 6d.
 1828 *Pourpre de Laché*, 1s. 6d.
 1829 *Prince Antoine d'Arenberg*, purple, shading to
 rose, 1s. 6d.
 1830 .. *Charles*, rose-purple, centre chamois, 1/6
 1831 .. *Proeper*, purple-magenta, showing golden
 anthers, 1s.
 1832 *Purpurea superba*, rich glowing purple, frag-
 rant, 1s. 6d.
 1833 *Reine des Fleurs*, full rose, centre tinged salmon,
 rose-scented, 3s. 6d.
 1834 *Reine des Roses*, guard petals deep rose, centre
 chamois-rose, 1s. 6d.
 1835 *Rosae magna*, rose, centre tinged primrose, rose-
 scented, 1s. 6d.
 1836 .. *maxima*, pink, inner florets white, tinged
 rose
 1837 .. *plenisima superba*
 1838 .. *præcox*, rose, early-flowering, 1s. 6d.
 1839 *Rosy Morn*, rose, fragrant
 1840 *Rubeeene semi-plena*, purple-red, golden
 stamens
 1841 *Rubra Triumphantis*, crimson
 1842 *Sidonia*, full rose, centre tinged salmon, rose-
 scented
 1843 *Sinensis grandiflora*, full rose, centre delicate
 rose, tinged salmon
 1844 *Sir Stafford Northcote*, rose, shading to pink,
 centre primrose, 3s. 6d.
 1845 *Souvenir d'Auguste Milliez*, rich purple
 1846 .. *de l'Exposition Universelle*, rose-purple
 1847 *Superba*
 1848 *Taeso*, 1s. 6d.
 1849 *The Queen* blush-rose, very large, rose-scented, 3/6
 1850 *Tricolor superba*
 1851 *Triomphe de Parie*, light rose, rose-scented, 1s. 6d.
 1852 *Versicolor*, deep rose, centre florets salmon-rose
 1853 *Virginal*, rose, conspicuous golden anthers
 1854 *Waterloo*, white, tinged peach, centre white
 1855 *Whitleji*, white shaded rose, rose-scented
 1856 *W. E. Gladetone*, blush, rose-scented, 3s. 6d.

HERBACEOUS HARDY EUROPEAN DOUBLE PÆONIAS (*Varieties of Officinalis*), May-flowering.

The Pæonias enumerated under this heading are very old inhabitants of our gardens, but at the present day not so generally known as their merits deserve. The grand double Pæonias from China, rich and magnificent as they are, have not a representative amongst them that will compare in brilliancy with the old double red Pæony, which, during the month of May, has for three centuries and more enriched English gardens.

Cultural treatment the same as for the Chinese Pæonias.

per doz. each

s. d.—s. d.

1857 Double Red Pæony, rich crimson, very large flowers abundantly produced	10	6	1	0
1858 Double Rose Pæony, flowers open full rose and pass off flesh colour, large and fine	15	0	1	6
1859 Double White Pæony, flowers open pale pink and pass off pure white, flowers large and fine	21	0	2	0
1860 Double Anemone-flowered Pæony, large rich crimson, petals somewhat irregular, an esthetic shaped flower	18	0	2	0

HERBACEOUS HARDY SPECIES AND VARIETIES OF SINGLE PÆONIAS (May and June-flowering).

The species and varieties of Single Pæonias offered in the following list are new to gardens, although not new introductions, and we recommend them as fine border plants, possessing considerable character and diversity in foliage and habit of growth; some are tall with a fine bold outline, others are dwarf and bushy,

[*Barr and Son*,

HERBACEOUS HARDY SINGLE PÆONIAS—continued.

some have very large poppy-like flowers, others, flowers not unlike water lilies, while others, again, have comparatively small flowers. On the whole, a more interesting class of plants for flower border decoration it would be difficult to find.

The literature of the Pæony dates from a very recent period, the first monograph was written the first quarter of the present century, Mr. Sabine having collected together, in his garden at North Mimms, all the Single Pæonias he could find, and with his friend, Mr. Anderson, made a very careful study of the whole family. This was completed in 1816, and February 4th and 18th, 1817, the result was read before the Linnaean Society. These plants of Mr. Sabine's do not appear to have found their way into private gardens, but possibly the occasional collections found in botanic gardens may have been formed from this first recorded collecting.

J. G. Baker, Esq., Royal Herbarian, Kew, always ready with a helping hand, finding that the Single Pæony was asserting its place in our gardens, prepared a monograph, bringing the knowledge of this family up to date, see *Gardeners' Chronicle*, 1884. From these two monographs, and with the kind personal assistance of Mr. Baker, we have been able to put in order our fine collection, which will be ready for delivery in October.

Cultural treatment same as for Chinese Pæonias.

OUR OWN SELECTION OF SINGLE PÆONIAS.

	s. d.		s. d.
1861 1 each of the Single Pæonias.....	8 <i>4</i> 0	1863 1 <i>2</i> in 1 <i>2</i> varieties Single Pæonias	18 <i>/</i> & 2 <i>5</i> 0

1865 Albiflora laciniata, very large, pure white flowers of fine form, with "yellow stamens"	7 6		
1866 " rosea, full rose, each petal feathered white, yellow stamens	5 6		
1867 " rubescens, rose going off to pink, yellow stamens, dwarf growth	1 6		
1868 Anomala, rich crimson, yellow stamens, elegantly cut foliage.....	3 6		
1869 Arietina, crimson going off to bright rose	1 6		
1870 " Andersonii, crimson going off bright rose, abundant foliage.....	1 6		
1871 " Baxteri (officinalis Baxteri), fine crimson flower, and fresh green foliage	1 6		
1872 Broteri (new), rich crimson, golden anthers, stem and leaf stalks coral-red, a very distinct, handsome plant, which flowered for the first time in England, at Tooting, 1886, and was figured in "Gardeners' Chronicle"	5 6		
1873 Brownii, an American species, and one of the most distinctive in character of any. A high Alpine plant, likely to succeed best on rockwork, where its roots will be dry in Winter and the plant not exposed to the scorching rays of the Summer sun. Small short leathery red or golden petals, with lobed fleshy disk, and finely cut foliage, height 1 ft.	3 6		
1874 Corallina, true deep crimson, rounded petals and yellow stamens; the ripe seeds are very ornamental	3 6		
1875 Decora, flowers numerous, opening crimson and going off deep rose	2 6		
1876 " elatior, flowers of great size on a stately plant, rich crimson going off deep rose	2 6		
1877 " Pallasi, flowers large, rich crimson going off a fine full rose	1 6		
1878 Hybrida, rich crimson, yellow stamens, elegantly cut foliage	3 6		
1879 Humilis, crimson, yellow stamens, dwarf compact growth	3 6		
1880 Lobata, rich cerise-salmon, very unusual colour, distinctly lobed foliage	2 6		
1881 Microcarpa, crimson, going off rose, very distinct elegant foliage	2 6		
1882 " var. Jonathan Gibson, crimson passing to rose, foliage very downy	2 6		
1883 Mollis, rich crimson, anthers golden, foliage downy	3 6		
1884 Officinalis anemoniflora (a), rich crimson, stamens replaced by crimson striped yellow, spirally twisted petals	3 6		
1885 (b), rich crimson, the spirally twisted petals are yellow, striped crimson	per doz. 1 <i>5</i> . 0		
1886 " rosea, " rich deep rose, stamens yellow	2 0		
1887 " sabini, rich deep crimson, yellow stamens, flower resembles a large red water lily	2 6		
1888 Paradoxa fimbriata (the double purple Pæony), the effect of the neat double flowers is enhanced by the projecting purple stamens; the plant is dwarf, compact, and bushy	2 6		
1889 Peregrina, rich crimson, anthers yellow	1 0		
1890 " byzantina (a), crimson passing off rose, anthers yellow	1 6		
1891 " (b), crimson, anthers yellow, dense bushy growth	1 6		
1892 " compacta, crimson, yellow stamens, dwarf bushy plant	2 6		
1893 Russi (Bot. Mag.), crimson, going off rose	1 c		
1894 Tenuifolia, rich crimson flowers, nestling amongst the finely divided leaves that crowd the top of the stalk	1 0		
1895 " pl., large double crimson flowers nestling amongst finely divided leaves	2 6		
1896 Triternata (Daurica), crimson, going off to rose, very distinct plant	2 6		
1897 Wittmanniana, creamy white, seeds rich coral-red	7 6		

At Amateurs who have Single Pæonias, we shall esteem it a favour to be informed what sorts they possess, as we are at present working upon the family, with the view of seeing what species and varieties exist in gardens, and any help will be most acceptable.

LIST OF HARDY ANNUALS FOR AUTUMN SOWING.

The seed may be sown in a prepared bed, and transplanted in October, or sown where intended to flower.

PART II.—DESCRIPTIVE LIST ALPHABETICALLY ARRANGED.

BULBS, TUBERS, AND PLANTS, NOT RECORDED IN PRECEDING PAGES.

Those marked thus * ripen late and will be ready to send out from the middle of October to March. All other bulbs, etc., are ready for despatch from 1st September. Orders which embrace later ripening bulbs, etc., will be executed in two parts, carrying forward those not ready for delivery, till they are safe to move.

	each—s. d.
1898 * <i>Abobra viridiflora</i> , an elegant hardy summer climber, with miniature scarlet fruits	1 0
1899 * <i>Achimenes</i> , 25 beautiful varieties, 1 root each, 10s. 6d.	
1900 * " 12 beautiful varieties, 3 roots each, 12s. 6d.	
1901 * " 12 beautiful varieties, 1 root each, 4s. 6d.	
1902 <i>Adonis pyrenaica</i> , taller, and with much larger yellow flowers than <i>A. vernalis</i>	1 6
1903 " <i>vernalis</i> , a beautiful spring-flowering hardy plant, with large star-shaped clear yellow flowers, quite hardy, 3 ft.	per doz. 5s. 6d. 0 6
1904 <i>Agapanthus umbellatus</i> (the Blue African Lily), flowers in handsome umbels, half-hardy	1 0
1905 " " <i>albus</i> (the White African Lily), flowers in handsome umbels, half-hardy	1 0
1906 " " <i>fol. variegatis</i> (the variegated African Lily), with silver-margined foliage	2 6
1906½ " " <i>Mooreanus</i> , small bright blue flowers in umbels, a graceful species	1 6
1907 <i>Allium acuminatum</i> , a beautiful hardy species, with bright rose flowers in umbels, 1 ft p. doz. 7s. 6d.	0 9
1908 " <i>aureum</i> , (Moly), bright yellow, flowers in umbels, 1 ft	" 13. 6d. 0 3
1909 " <i>auratum</i> , handsome intense blue flowers, quite hardy	5s. 6d. 0 6
1910 " <i>descendens</i> , large dark red-purple flower heads, in compact umbels, 2 ft.	" 4s. 6d. 0 6
1911 " <i>neapolitanum</i> , white flowers, much used in bouquets per 100, 5s. 6d. ;	" 1s. 0 3
1912 " <i>pedemontanum</i> , rose-purple, drooping bell-shaped flowers in clusters, beautiful, 3 ft.	" 1s. 0 3
1913 " <i>roseum</i> , most pleasing rosy puce colour	per doz. 3s. 6d. 0 4
1914 " <i>rubellum</i> , rosy violet, very pretty	" 4s. 6d. 0 6
1915 " <i>triquetrum</i> , flowers white, striped green, 1 ft.	" 4s. 6d. 0 6
<i>All the Alliums are hardy and very showy.</i>	
1916 * <i>Alstroemeria aurea</i> , orange flowers, spotted carmine	" 3s. 6d. 0 4
1917 * " <i>aurantiaca</i> , flowers similar to <i>A. aurea</i> , but deeper and richer in colour	" 5s. 6d. 0 6
1918 * " <i>haemantia</i> , various beautiful colours	" 4s. 6d. 0 6
1919 * " <i>peregrina alba</i> , white, very beautiful flowers	5 6
1920 * " <i>rosea</i> , rose-coloured flowers, beautifully spotted	2 6
1921 * " <i>psittacina</i> (Parrot-flowered), bright crimson flowers distinctly splashed with green and mahogany, 3 ft.	per doz. 4s. 6d. 0 6
1922 * " <i>tricolor</i> , white and yellow, striped and blotched crimson	" 5s. 6d. 0 6
1923 * " in fine mixture	" 3s. 6d. 0 6
<i>These beautiful plants are perfectly hardy, very easy to cultivate, and most valuable to cut for vases. Plant at a depth of one foot, and by preference close to a wall.</i>	
1924 * <i>Amorphophallus Rivieri</i> (Umbrella Arum), a very curious and handsome plant, with large palmate leaves, 2 to 3 feet in diameter, on a white spotted stem; plant in April	1 0
1925 * <i>Anomatheca cruenta</i> , a charming dwarf pot plant, with small bright scarlet, crimson-blotted flowers, also elegant for edging out of doors; plant in Spring	per doz. 1s. 6d. 0 3
1926 Annuals for Autumn Sowing	12 packets, in 12 beautiful vars., 2s. 6d. & 3 6
1927 "	25 in 25 " 5s. 6d. & 7 6
1928 * <i>Anthericum liliastrum</i> (St. Bruno Lily), pure white, Lily-like flowers, hardy, 1 ft. per doz. 10/6 1 0	
1929 * " <i>majus</i> , large pure white flowers, a valuable hardy plant, 2 ft.	15/- 1 6
1930 * " <i>lliago</i> (St. Bernard's Lily), beautiful pure white starry flowers, hardy, 1½ ft.	5/6 0 6
1931 * " <i>majus</i> , the large starry white flowers are produced on spikes, 2 to 2½ ft.	7/6 0 9
1932 * " <i>graminifolium</i> , small white flowers, very abundant, 1½ ft.	4/6 0 6
1933 * <i>Antholyza</i> , mixed varieties, culture same as for Early Gladioli (see page 32)	2/6 0 3
<i>The long Gladiolus-like flower spikes of the Antholyza make a nice variation in the flower-border.</i>	
1934 * <i>Apolis tuberosa</i> , a vigorous rapid growing hardy deciduous climber, with orange-scarlet flowers and elegant foliage; a most useful bulbous plant for covering arbours, trellises, &c. per doz. 3/6 0 4	
1935 * <i>Aquilegia glandulosa</i> , the beautiful blue and white dwarf Columbine	" 7/6 0 6
1936 <i>Arum cornutum</i> , red flowers, spotted black, stem curiously marbled	0 6
1937 " <i>crinitum</i> , flowers reddish brown, and of immense size, stem marbled	0 6
1938 " <i>dracunculus</i> , large purple red and black-blue flower, marbled stem, very handsome	0 6
1939 " <i>italicum</i> , greenish white, strikingly variegated leaves	0 4
1940 * <i>Asclepias tuberosa</i> , fine orange flowers, quite hardy, a fine herbaceous plant, 3 ft. per doz. 7/6 0 9	
1941 * " <i>incarnata</i> , purple-rose, vanilla-scented, a good plant for bees, quite hardy, 3 ft.	5/6 0 6
1942 * <i>Asphodelus luteus</i> , fine border plant, perfectly hardy, 3 ft.	0 6
1943 * " <i>ramosus</i> (King's Spear), white, a fine plant, perfectly hardy, 3 ft.	0 9
1944 <i>Auriculas</i> , fine hardy border varieties	per doz. 7s. 6d. 0 9
1945 " named alpine varieties	per doz. 21s. to 42s.; each, 2s. 6d. to 5 6
1946 " stage varieties	per doz. 42s. to 63s.; each, 3s. 6d. to 7 6
1947 * <i>Begonias</i> , large-flowered varieties in colours for Bedding, crimson, scarlet, rose, white, orange, and yellow. These beautiful new bedding Begonias are more hardy than the Scarlet Geranium, and remain longer decorative. They require the same winter treatment as the Dahlia, and, like this plant, should be started into growth in Spring and planted out in June,	
	each colour separate, or in mixture, per doz. 9s.; per 100, 63s.
1948 * <i>Begonias</i> , 6 in 6 named beautiful varieties	5s. 6d., 7s. 6d., 10s. 6d., & 15s.
1949 * " 12 in 12 named beautiful varieties	10s. 6d., 15s., 21s., & 30s.
1950 * " choice mixed large-flowered varieties	per doz. 5s. 6d. & 7s. 6d.
1951 * " double, handsome named varieties	per doz. 42s., 48s., & 63s.
1952 * <i>Bletia hyacinthina</i> (almost hardy), a fine orchid of easy culture, with beautiful violet and white flowers. Much grown in China for its grateful perfume, June-flowering, 1 ft., per doz. 15s. 1 6	
1953 " <i>acutiloba</i> , rose and white, flowers in June	2 6
1954 <i>Bloomeria aurea</i> , beautiful golden flowers in umbels, quite hardy, 1 ft.	per doz. 4s. 6d. 0 6
1955 <i>Eobartia aurantiaca</i> , brilliant salmon-rose, hardy on light soils or rockwork, 1 ft.	" 2s. 6d. 0 3

[Barr and Son,]

ALPHABETICAL LIST OF BULBS, TUBERS, AND PLANTS.

41

		each—s. d.
1956	* <i>Bomarea Caldasiana</i> , flowers orange-scarlet, with yellow, spotted crimson, figured in "The Garden," August 6th, 1881	7 6
1957 *	" <i>Carderi</i> , a magnificent species, with large clusters of lilac and rosy white flowers	10 6
1958 *	" <i>oculata</i> , very beautiful climbing species, with six or eight purple-spotted, red flowers in a cluster, half-hardy	per doz. 4s. 6d. 0 6
	The <i>Bomareas</i> are magnificent greenhouse plants, and do best in a compost of equal parts rough sand, turf, loam, and peat. When growing, manure-water should occasionally be given.	
1959	* <i>Boussingaultia baselloides</i> , an elegant climber and a valuable plant for hanging baskets, window boxes, rustic tubs, etc., leaves pale green and fleshy, hardy on dry rockwork	per doz. 4s. 6d. 0 6
1960	* <i>Bravoa geminiflora</i> , flowers in long racemes of orange-scarlet resembling <i>Chelone barbata</i> ; a good plant indoors, and hardy in the flower border, 1½ ft.	per doz. 4s. 6d. 0 6
1961	<i>Brodiaea coccinea</i> (the Vegetable Fire Cracker of California), flowers magenta, tipped pea-green, a most remarkable flower, 1½ ft. Figured in "The Garden," 1876	per doz. 1s. 6d. 1 0
1962	" <i>congesta</i> , lilac, flowers in rosettes on tall stems, valuable as a cut flower, quite hardy. Figured in "The Garden," 1881, 2 ft.	per doz. 1s. 6d. 0 6
1983	" <i>alba</i> , flowers white	5s. 6d. 0 3
1984	" <i>grandiflora</i> , flowers bright blue, a charming dwarf plant, quite hardy, ½ ft.	1s. 6d. 0 3
1965	" <i>volubilis</i> , a twining species with a terminal umbel of rose-purple flowers	2 6
1966	<i>Brunsvigia coranica</i> , flowers delicate rose, powerfully orange-scented, 3 ft.	7 6
1987	" <i>Josephinae</i> , flowers orange-scarlet, with 50 to 60 flowers on an umbel, 3 ft.	12 6
1968	" <i>multiflora</i> , large umbel of red flowers, 3 ft.	7 6
	The <i>Brunsvigia</i> , or Giant Amaryllis, requires warm-house treatment; on stout stems are produced immense umbels, crowded with large flowers. <i>Josephinae</i> has an umbel of 3 feet in diameter.	
1969	<i>Bulbocodium vernum</i> , early in Spring this fine bulb produces a mass of rose-purple flowers close to the ground; valuable for edgings and rockwork, hardy, ½ ft. per 100, 7s. 6d.; per doz., 1s. 3d.	15 0
1970	<i>Buphanes toxicaria major</i> , orange-red, 1 ft.	12 6
1971	" <i>minor</i> , pink, ¾ ft.	12 6
	<i>The Buphanes</i> are closely allied to the <i>Brunsvigias</i> , and require the same treatment; their fine pink and orange-scarlet flowers are produced in great umbels.	
1972	* <i>Caladium</i> , 12 in 12 named beautiful varieties	21s., 30s., & 42s.
1973 *	" 6 in 6	12s., 15s., & 21s.
	<i>Caladiums</i> are perhaps the most beautiful and picturesque of foliage stove plants.	
1974	* <i>Calla ethiopica</i> , large white flowers	per doz., 7s. 6d. 0 9
1975 *	" <i>albo-maculata</i> , foliage beautifully spotted white	5s. 6d. 0 6
1976 *	" <i>hastata</i> , fine yellow flowers, with black centre and white spotted leaves	3 6
1977 *	" <i>melanoleuca</i> , fine primrose flowers, with black centre	0 9
	<i>The Callas</i> are all greenhouse plants. <i>Ethiopica</i> is the Lily of the Nile, and one of the very useful plants which is extensively grown for Covent Garden Market. <i>Albo-maculata</i> is much prized for its beautifully-spotted foliage; <i>Hastata</i> for its fine yellow flowers. See figure in "The Garden," 1880.	
1978	<i>Calliprora flava</i> , flowers yellow, with brown stripe, in umbels, a fine hardy bulb	per doz., 3s. 6d. 0 4

2017	" speciosum rubrum, intense crimson-magenta, petals of great substance, and flowers the largest and most magnificent of the family. Figured in "The Garden," 1879, p. doz., 10s. 6d.	" 7s. 6d.	0 9
2018	" variegatum, chequered rose-purple and white	per 100, 7s. 6d.; per doz., 1s. 3d.	0 3
2019	" pallidum, delicate rose, chequered white	" 10s. 6d.	1 0
2020	The great Crocus-like flowers of the <i>Colchicum</i> , or Autumn Meadow-Saffron, carpet the ground in September and October with colours ranging from pure white to the intense crimson of <i>Speciosum rubrum</i> , which was figured in "The Garden" of 30th June, 1877. All the <i>Colchicum</i> flowers are more or less chequered. <i>Parkinsoni</i> and <i>Variegatum</i> are the most conspicuously and elegantly chequered. The foliage appears in Spring, and is almost as varied as the flowers; some have large massive leaves, others small and frill-like; a grand bulb to naturalize in grass.		
2021	* <i>Commelinia tuberosa</i> , a fine border plant, blossoms of the richest blue, with continuous succession of flowers during Summer and Autumn; plant in Spring, 1½ ft.	per doz., 3s.	0 4
2022	" <i>alba</i> , flowers pure white, in succession till late in Autumn; plant in Spring, 1½ ft.	per doz., 3s.	0 4
2023	* <i>Conanthera bifolia</i> , pretty drooping star-shaped flowers, deep azure-blue, dark violet centre; requires a little protection during winter		3 6
2024	<i>Cooperia Drummondii</i> , solitary fragrant white flowers, 5 or 6 inches long, borne on a graceful stem, surrounded by slender elegant leaves; greenhouse bulb, forces well, ½ ft.		1 6
2025	" <i>pedunculata</i> , this species opens its fragrant white flowers under glass at night, 1½ ft.		1 0
2025	<i>Coreopsis lanceolata</i> , flowers bright yellow, valuable for cutting, hardy perennial, 3 ft.		0 6
2026	<i>Corydalis bulbosa</i> , red, a fine native plant to naturalize, ½ ft.	per 100, 10s. 6d.; per doz., 1s. 6d.	0 3
2027	" <i>cava albiflora</i> , white, a very elegant sweet-smelling Spring flower, 1 ft.	" 7s. 6d.	0 9
2028	" <i>eximia</i> , bright red, graceful, ¾ ft.	" 5s. 6d.	0 6
2029	" <i>nobilis</i> , yellow, a grand plant, 1 ft.	" 10s. 6d.	1 0
	The <i>Corydalis</i> , or Fumitory, are elegant hardy border plants; <i>Eximia</i> and <i>Nobilis</i> make fine pot-plants.		
2030	* <i>Crinum americanum</i> , splendid white flowers, 6 to 8 inches long, 2 ft.		4 6
2031	* " <i>aquaticum</i> , flowers rosy red; stand this remarkable plant whilst growing in water, 3 ft.		5 6
2032	* " <i>erubescens</i> , flowers white, 2 ft.		10 6
2033	* " <i>riparium</i> , beautiful rose-scented flowers, 2 ft.		7 6
	These <i>Crinums</i> are truly grand warm greenhouse plants, with large Amaryllis-like flowers.		
2034	* <i>Crocosmia aurea</i> . This is a graceful plant with bright orange flowers in racemes, equally prized in or out of doors, and as a cut flower in September; culture same as Spring-planted Gladioli	per doz., 1s. 6d.	0 3
2035	<i>Crown Imperial</i> , Crown upon Crown, 3 ft.	The <i>Crown Imperial</i> (<i>Fritillaria imperialis</i>) is a stately hardy border plant, effective in Spring. Its tall stem terminating in a cluster of pendant bell-shaped flowers, surmounted by a tuft of fresh green leaves.	per doz., 7s. 6d. 0 9
2036	" Gold-striped foliage, 3 ft.		1 6
2037	" Orange Crown, orange-red, 3 ft.		0 9
2038	" Single Red, 3 ft.		0 6

2184	" <i>viridis</i> , green and white, 1 ft.		1	6
We acquired the late Rev. John Nelson's stock of <i>Lachenalias</i> , and have no hesitation in saying the variety which is associated with his name surpasses in beauty and free-flowering all other species and varieties, and has done much to popularize this very interesting class of plants. The <i>Lachenalias</i> should be potted early in a compost of loam, sweet leaf soil, and sand, placed in a greenhouse or frame, and never allowed to suffer for want of water. See Plate in "The Garden," 1880.				
2185	<i>Lapageria alba</i> , a magnificent white-flowered greenhouse climber, 7s. 6d., 10s. 6d., 15s., 21s., 42s. & 6s. 0			
2186	" <i>rosea superba</i> , large rosy crimson flowers	7s. 6d., 10s. 6d., 15s. & 21s. 0

2204 *	" <i>superba</i> , rich orange and yellow } climber; when trained on a globe or along a wire, }	7 6
2205 *	" <i>virescens</i> , yellow its splendid blossoms are seen to the best advantage. }	3 6
2206 *	<i>Michaelmas Daisies</i> , 12 in 12 beautiful varieties 9s. & 12s.	0 9
2207 *	" 18 in 18 " 15s. & 18s.	0 9
2208 *	" 25 in 25 " 21s. & 25s.	0 9
2209 *	" 30 in 30 " 25s. & 30s.	0 9
	The Michaelmas Daisy, or Aster, represents a family of decorative hardy herbaceous plants, of easy culture; for several months their beautiful star-shaped flowers are freely produced, and continue long in good condition. A collection, well assorted, will give a succession of flowers from May till late in November. As a cut flower it is one of the most elegant for vases.	
2210 *	<i>Michauxia campanuloides</i> , rose white, giant bell-flowered Campanula, the beautiful flowers once seen will not soon be forgotten, quite hardy, 3 ft. per doz., 7s. 6d.	0 9
2211	<i>Milla biflora</i> , pure white, large flowers; this is a beautiful Mexican bulb, which should be grown in pots under glass, or kept dry during winter, and planted out in March. per doz., 7s. 6d.	0 9
2212 ..	<i>hyacintha lactea</i> , pure white, an exceedingly useful plant for cut flowers, 2 ft. , 5s. 6d.	0 6
2213 ..	<i>lilacina</i> , flower heads beautiful lilac, 2 ft.	1 6
2214 ..	<i>laxa</i> , rich Tyrian purple, 1 ft. per doz., 7s. 6d.	0 9
2215 ..	" <i>maxima</i> , large rich Tyrian purple flowers, 1 ft. , 7s. 6d.	0 9
2216 ..	<i>longipes</i> , beautiful white flowers borne in umbels , 7s. 6d.	0 9
2217 ..	<i>Murrayana</i> , fine lavender-blue, lined purple, 1 ft. per 100, 3s. 6d.; per doz., 6d.	0 9
2218 ..	<i>uniflora conspicua</i> , white, shaded porcelain, 2 ft. per 100, 3s. 6d.; per doz., 6d.	0 9
2219 ..	<i>lilacina</i> , porcelain, striped violet, 2 ft. per 100, 3s. 6d.; per doz., 6d.	0 9
2220 ..	mixed per 100, 3s. 6d.; per doz., 6d.	0 9
	The <i>Milla</i> (<i>Triteleia</i>) is a family of varied character; <i>Uniflora</i> is very dwarf, and charming as an edging, and in beds or masses no prettier effect is produced in Spring than an admixture of this and <i>Anemone apennina</i> ; <i>M. laxa</i> and <i>Murrayana</i> in June and July produce large umbels of the most lovely coloured flowers; <i>M. hyacintha lactea</i> is exceedingly decorative, and <i>M. lilacina</i> most beautiful; all are perfectly hardy. See Plate in "The Garden," 1880.	
2221	<i>Modiola geranioides</i> (figured in "The Garden" of 28th Jan., 1882). This charming hardy rock plant is profusely covered with intense magenta-purple flowers throughout the summer months	1 6
2222	<i>Moutbretia Pottsi</i> , beautiful crimson-scarlet, small Gladioli-like flowers, with a branched spike like <i>Crocosmia aurea</i> , quite hardy, 2 ft. Figured in "The Garden," 1880 per doz. 3s. 6d.	0 4
2223 ..	<i>crocospisflora</i> , larger and deeper coloured flowers than <i>M. Pottsi</i> per doz. 5s. 6d.	0 6
2224	<i>Moraea edulis</i> , bluish white, $\frac{1}{2}$ ft.	0 6
2225 ..	<i>iridoides</i> , white, spotted yellow, $\frac{1}{2}$ ft.	0 6
2226 ..	<i>papilionacea</i> , pale blue, spotted dark blue, $\frac{1}{2}$ ft.	0 6
2227 ..	<i>tricuspidis</i> , greyish yellow and brown, $\frac{1}{2}$ ft.	0 6
2228 *	<i>Morina longifolia</i> , very handsome hardy herbaceous plant, with long spiny leaves and beautiful rose-purple flowers, $\frac{1}{2}$ ft.	0 9
2229	<i>Nerina corrusca</i> , bright dazzling scarlet with 20 to 25 flowers in a cluster, 1 ft.	1 0
2230 ..	<i>crispata</i> , dark rose colour, curiously crisped and curled, winter-flowering, $\frac{1}{2}$ ft.	2 6
2231 ..	<i>flexuosa</i> , distinct species, with rich pink flowers, 1 ft.	0 9
2232 ..	<i>Fothergillii</i> , a superb variety with deep vermilion-scarlet flowers, 1 ft.	1 6
2233 ..	<i>undulata</i> , rosy carmine, very beautiful 1 ft.	2 6
2234	<i>Onthera Youngi</i> , a handsome Evening Primrose, with bright yellow flowers per doz., 7s. 6d.	0 9
2235	<i>Ophiopogon</i> , fine rock plants 1 each 6 fine varieties 2s. 6d.	0 6
2236	<i>Ophrys and Orchis</i> , 12 in 12 distinct beautiful hardy varieties for peat borders.	15 0
2237 ..	6 in 6	7 6
2238	<i>Ornithogalum arabicum</i> , white, black centre, handsome fragrant flowers in June, 1 $\frac{1}{2}$ ft., per doz. 4/6	0 6

2281	Primula rosea, a charming new species, with beautiful rose-coloured flowers.....per doz., 7s. 6d. 0 9	

NEW HARDY PYRETHRUMS.

Plants always ready to send out, and may at any time be planted out.

In May and June the new Pyrethrums occupy the same position as that held by the Chrysanthemum in September and October, therefore the name "Spring-flowering Chrysanthemum" has not inappropriately been given to them. The flowers are large, elegantly formed, and vary in colour from snow-white to the richest crimson. The habit of the plant is graceful, the foliage elegant, and the flowers are produced in great profusion. The hardiness of this plant is beyond all doubt, having stood uninjured without the slightest protection during the recent series of unusually severe winters. In herbaceous borders, in front of shrubs, and in situations where variety of colour is important, Pyrethrums are matchless. As a cut flower for vases and table decoration, the blossoms are of the greatest value, and last in water longer than any other flower. At Flower Shows in May and June the Pyrethrum is one of the most attractive amongst cut flowers.

In addition to the early summer display, the Pyrethrum is cut back and encouraged to make vigorous growth in Summer, will again flower profusely in Autumn.

Our Annual Exhibitions of these flowers at the Royal Horticultural Gardens, South Kensington, and at King Street, always attract much attention.

| 2398 " sulphureum, soft yellow, 1 ft. 0 6 | |
| 2399 *Smilacina bifolia, pure white flowers, with bright green leaves per doz., 5s. 6d. 0 6 | |
| 2400 Sparaxis pulcherrima, a remarkable plant, with a dense elegant grassy foliage, from which rise graceful wiry flower stems 3 to 5 feet high, arching over in a broad graceful curve, from which hang beautiful bell-shaped flowers; quite hardy. Figured in "The Garden," 1881.....1s. 6d. & 2 s. 6 | |
| 2401 *Thladiantha dubia, a fine robust climber, valuable for covering arbours, bowers, etc., producing abundantly during summer, large yellow flowers.....per doz., 5s. 6d. 0 6 | |
| 2402 *Tiarella cordifolia, a beautiful hardy plant for rockeries, with pure white feathery flowers, and heart-shaped leaves..... 0 0 | |
| 2403 Tigridia conchinora, petals yellow, cup yellow, spotted scarlet, 1 ft. per doz., 3s. 6d. 0 4 | |
| 2404 " grandiflora, petals rich scarlet, cup spotted crimson on yellow ground, flowers very large, American roots, ready in December or January, 1 ft. per doz., 3s. 6d. 0 4 | |
| 2405 " alba, petals white, cup spotted ruby, exceedingly beautiful.....4s. 6d. 0 6 | |
| No flower is more gorgeously coloured than the Tigridia. The roots may be planted in March, April, and May; or for pot-culture earlier. Plantings may be made as late as Midsummer, and if lifted and potted up in September, they will flower under glass late in Autumn. 0 0 | |
| 2406 *Tradescantia, a remarkably distinct handsome border plant, in flower Summer and Autumn; the flowers range from pure white to the richest purple, with reds and blues, 10 in 10 beautiful vars. 5/6 0 9 | |
| 2407 *Tricyrtis hirta grandiflora, white, spotted black, and tinted rose, 2 ft. per doz., 4s. 6d. 0 6 | |
| 2408 " nigra, black, spotted white, 2 ft. 0 6 | |
| 2409 " macropodium, yellow, spotted black, 2 ft. 0 6 | |
| Tricyrtis, a family of New Japanese hardy plants, remarkable for the singularity of their beautiful blossoms. They should be in every flower border, and grown in every greenhouse for winter-flowering, King Street, Covent Garden, 1886.] 0 6 | |

		each s. d.
2410	Trillium atro-purpureum, deep purple	1 6
2411	" grandiflorum (the Wood Lily), flowers of the purest white	1 6
	Trillium grandiflorum is a valuable plant for moist peat beds and shady places. Grown several together in a pan, and forced early into flower, it is one of the most useful of white winter flowers.	
2412	Tritoma glaucescens, the rich orange-scarlet flower spikes on stems 3 to 5 feet high, blossom from July to September	per doz., 10s. 6d.; 1s. & 1 6
2413	" grandis, the bright orange-scarlet flower spikes, on stems 3 to 5 feet high, blossom from August to December	per doz., 10s. 6d.; 1s. & 1 6
2414	" Burchellii, red and yellow, a very fine distinct species, 2 ft.	2 6
2415	" Leichtlini, apricot colour, with protruding yellow stamens, a very handsome new species. Figured in "The Garden," 28th May, 1881, as Kniphofia carnosa, 1½ ft.	5 6
2416	" Macowanii, a dwarf species with orange flowers, 2 ft. Figured in "The Garden," 1877	1 6
2417	" Nobilis, scarlet and yellow, very handsome, 5 ft.	2 6
2418	" Saundersi, bright red, 5 ft.	3 6
	The noble aspect of the Tritomas (Kniphofias) renders them unlike all other border plants; from the midst of a dense root foliage rise stout stems surmounted with thousands of small fiery-red flowers; grand plants for shrubberies and wild gardens.	
2419	Tropaeolum azureum (rare), an extremely beautiful species, with rich blue flowers	7 6
2420	" brachyceras, a fine yellow-flowered species	3 6
2421	" Jarratti, scarlet, orange, and black	1s. & 1 6
2422	" pentaphyllum, red and green, perfectly hardy	1 6
2423	" polypodium, golden-yellow flowers in long trusses, quite hardy.... per doz., 7s. 6d.; 1s. & 1 0	
2424	" speciosum, rich scarlet flowers in clusters, quite hardy.... in established pots, 1s. 6d. & 2 6	
2425	" tricolor, scarlet, orange, and black	1 0
2426	" tuberosum, yellow and red, very distinct, quite hardy..... per doz., 5s. 6d.	0 6
2427	Tuberose, Double American, "The Pearl"; this variety is most prized, being comparatively dwarf, flowers pure white and perfectly double	per doz., 5s. 6d. 0 6
2428	" " African-grown roots; these are ready to plant from October	per doz., 4s. 6d. 0 6
2429	" " extra strong selected roots, which usually give 2 to 3 flower spikes, each with 20 to 30 blossoms..... per doz., 7s. 6d. 0 9	
	CULTURAL TREATMENT FOR FORCED FLOWERS.—The growers for Covent Garden pot the Tuberose singly in 5 or 6-inch pots, and plunge in moist bottom heat, withholding water till the foliage appears, then giving it freely, growing on in a house with a high temperature, and a moist atmosphere, till the flower buds develop; at this stage, if the plants are for the conservatory or sitting-room, remove to a greenhouse temperature. The bulbs for early flowering pot as soon as they can be procured, and keep in a temperature not below 60 degrees. The bulbs for succession pot at once, to make root growth, or keep them dry in a temperature not below 50 degrees.	
2430	Tulbaghia violacea, rose-lilac, in neat umbels, hardy, 1 ft.	0 9
2431	Tussilago fragrans (The Winter Sweet-scented Heliotrope), strongly fragrant, pinky white flowers	0 6
2432	*Ueceolina aurea, a splendid warm-house bulb, with large golden-yellow flowers, tipped with rich green, and produced in graceful drooping terminal clusters	5 6
2433	Uropetalum hyacinthoides, rose, ¾ ft. } The flower spikes of these rare bulbs { per doz., 2s. 6d. 0 3	
2434	" viride, green, ¾ ft. } are extremely pretty. { 2s. 6d. 0 3	
2435	*Uvularia amplexicaulis, golden-yellow, 1 ft. } Uvularias have elegant tube-shaped { " 7s. 6d. 0 9	
2436	* " perfoliata, golden-yellow, ¾ ft. } flowers, with habit of Solomon's Seal. { " 7s. 6d. 0 9	
2437	*Veltheimia capensis, pink, 2 ft. } Handsome greenhouse bulbs, with fine flower {	2 6
2438	" glauca, flesh, 2 ft. } spikes and wavy leaves.	3 6
2439	*Veratrum album, distinct, white, striped flowers } The large ribbed leaves, and fine flower spikes of { 2 6	
2440	* " nigrum, distinct, dark purple flowers } Veratrum always elicit admiration; hardy. { 2 6	
2441	Viola odorata arborea, double white	per doz., 5s. 6d. 0 6
2442	" " double blue	7s. 6d. 0 9
2443	" Belle de Chatenay corulea plena, beautiful clear blue double flowers; quite new..	1 0
2444	" Comte de Brazza, a beautiful new double snow-white variety, deliciously fragrant..	1 6
2445	" Czar, very large dark purple flowers	per doz., 7s. 6d. 0 9
2446	" white, very fine large flowers.....	0 9
2447	" devoniensis, deep blue large single flowers, very fine variety.....	0 9
2448	" King of the Violets, extra large flowers of the deepest blue	0 9
2449	" Marie Louise, lavender, white centre, double, winter-blooming	per doz., 7s. 6d. 0 9
2450	" Neapolitan, beautiful for greenhouse culture; flowers mid-winter per doz., 5s. 6d. 0 6	
2451	" odorata alba, single white, dwarf, pretty and distinct	0 9
2452	" Single Red	per doz., 7s. 6d. 0 9
2453	" Russian double blue, a fine variety	0 9
2454	" Parmensis f. pleno, large double flowers, white, striped rose.....	0 9
2455	" Victoria Regina, a very large-flowered variety	0 9
2456	" Double Red, a fine mauve colour	per doz., 7s. 6d. 0 9
2457	Virginia creeper, large-leaved variety, fine plants.....	1s. 6d., 2s. 6d. & 3 6
2458	" small-leaved variety (<i>Ampelopsis Veitchii</i>)	1s. 6d., 2s. 6d. & 3 6
2459	Wachendorfia brevifolia, yellow flowers in abundant racemes	0 9
2460	" thyrsiflora, yellow flowers produced on a much-branched panicle	0 9
2461	Watsonia, 6 in 6 named vars. } The Watsonia is very ornamental, and takes the { 2s. 6d. 0 6	
2462	mixed varieties } same cultural treatment as the Early Gladiolus. { per doz., 2s. 6d. 0 3	
2463	Yucca recurva variegata, a fine ornamental hardy plant, with variegated foliage; plants from the open ground	3s. 6d., 5s. 6d., 7s. 6d., 10s. 6d., 15s. & 21s. 0 9
2464	Zephyranthes atamasco, true, white.....	These Swamp Lilies are a 2 6
2465	" candida, white	charming family for the green- per doz., 1s. 6d. 0 3
2466	" major, white	house, and to plant under a south 0 6
2467	" carinata, rose	wall. Candida is quite hardy 1 6
2468	" ochroleuca, yellow	and beautiful as an edging. 0 9
2469	" rosea, deep rose	See plate "Garden," 1877. 1 0
2470	Primrose-Polyanthus, a very fine strain of beautiful varieties. Sow in autumn...per packet, 1s. & 2 6	
2471	Papaver umbrosum, rich crimson poppy, with black blotches. Sow in autumn ... "	0 6
2472	Munstead Poppy, a great variety of beautiful shades of colour. Sow in autumn... "	6d. & 1 0
2473	Hardy Annuals, in many beautiful varieties. For autumn sowing each variety, "	3d. & 0 6
